#### Glossar

Glossary	
Term	Definition
Monthly Principal Payment Rate (PPR)	Monthly PPR means the total scheduled and unscheduled principal receipts, including the proceeds from loan repurchases by the Seller, received during the Calculation Period ended prior to a Calculation Date divided by the aggregate current balance of the loans comprised in the Portfolio as at the start of the Calculation Period. Where New Loans have been transferred into the Portfolio during the period, PPR is calculated on a weighted average basis.  The rate is then annualised using the formula: 1-((1-M)^12) where M is the monthly PPR expressed as a percentage.
Amount (GBP)	In relation to any Loan at any date (the current balance determination date), the aggregate at such date (but avoiding double counting) of:
Amount (GBP)	(i) the Initial Advance:
	(ii) Further Advances and/or Flexible Loan Drawings;
	(iii) Capitalised Expenses;
	(iii) Capitalised Interest; and
	(v) Capitalised interest, and (v) all expenses, charges, fees, premium or payment due and owing by the Borrower which have not yet been capitalised,
	in each case relating to such Loan less all prepayments, repayments or payments of any of the foregoing made on or prior to the amount balance determination date; and in relation to any
	Mortgage Account at the amount balance determination date, the aggregate at such date of the Amount balance in respect of each Loan comprised in the relevant Mortgage Account
Mortgage Collections	All cash receipts on a mortgage within the portfolio including monies paid by Lloyds Bank plc in respect of loans repurchased from the portfolio.
Non-indexed LTV	The aggregate current balance of the loans in a mortgage account divided by the latest valuation of the property, held in the Seller's records, securing that mortgage account, at the reporting date.
Loan Seasoning	Seasoning is reported on an aggregated basis for each mortgage account. It is calculated using the origination date of the original loan in the mortgage account and ignores any subsequent loans on the mortgage account.
Remaining Term	The number of remaining months of the term of the mortgage account i.e. the loan with the longest dated maturity.
Indexed LTV	The aggregate current balance of the loans in a mortgage account divided by the indexed valuation of the property, held in the Seller's records, securing that mortgage account, at the reporting date.
Indexed Valuation	Indexation is applied quarterly, on a regional basis, to property valuations in January, April, July and October of each year using the Halifax House Price Index.
