

Lloyds Banking Group plc

2020 Half-Year
Pillar 3 Disclosures
30 June 2020

BASIS OF PREPARATION

This report presents the half-year Pillar 3 disclosures of Lloyds Banking Group plc ('the Group') as at 30 June 2020 and should be read in conjunction with the Group's 2020 half-year results.

The disclosures have been prepared in accordance with the Capital Requirements Directive and Regulation (CRD IV) and the European Banking Authority's revised guidelines:

- on materiality, proprietary and confidentiality and on disclosure frequency;
- on Pillar 3 disclosure formats and frequency that were published in December 2016 and;
- on uniform disclosures regarding the transitional period for mitigating the impact of the introduction of IFRS 9 on own funds that were published in January 2018.

The disclosures provided in this report include those that were adopted from 31 December 2017, where they are required to be disclosed on a semi-annual basis, although certain disclosures have been excluded on the grounds that they are non-material (refer to page 58).

In addition the report includes disclosure of exposures subject to measures applied in response to the COVID-19 crisis, in line with the EBA guidelines published in June 2020, as amended by the PRA. The disclosures cover information on exposures subject to legislative and non-legislative moratoria and on newly originated exposures subject to public guarantee schemes.

The information presented in this Pillar 3 report is not required to be, and has not been, subject to external audit.

The minimum Pillar 1 capital requirements referred to in this document are 8 per cent of aggregated risk-weighted assets.

Consolidated Pillar 3 disclosures for the Group's ring-fenced banking group (Lloyds Bank plc) and further disclosures surrounding the capital resources, leverage exposures and capital requirements of large subsidiaries ("Bank of Scotland plc" and "Lloyds Bank Corporate Markets plc") will be published separately on the Group's website, located at www.lloydsbankinggroup.com/investors/financial-performance/

FORWARD LOOKING STATEMENTS

This document contains certain forward looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and section 27A of the US Securities Act of 1933, as amended, with respect to the business, strategy, plans and/or results of Lloyds Banking Group plc together with its subsidiaries (the Group) and its current goals and expectations relating to its future financial condition and performance. Statements that are not historical facts, including statements about the Group's or its directors' and/or management's beliefs and expectations, are forward looking statements.

Words such as 'believes', 'anticipates', 'estimates', 'expects', 'intends', 'aims', 'potential', 'will', 'would', 'could', 'considered', 'likely', 'estimate' and variations of these words and similar future or conditional expressions are intended to identify forward looking statements but are not the exclusive means of identifying such statements.

Examples of such forward looking statements include, but are not limited to: projections or expectations of the Group's future financial position including profit attributable to shareholders, provisions, economic profit, dividends, capital structure, portfolios, net interest margin, capital ratios, liquidity, risk-weighted assets (RWAs), expenditures or any other financial items or ratios; litigation, regulatory and governmental investigations; the Group's future financial performance; the level and extent of future impairments and write-downs; statements of plans, objectives or goals of the Group or its management including in respect of statements about the future business and economic environments in the UK and elsewhere including, but not limited to, future trends in interest rates, foreign exchange rates, credit and equity market levels and demographic developments; statements about competition, regulation, disposals and consolidation or technological developments in the financial services industry; and statements of assumptions underlying such statements.

By their nature, forward looking statements involve risk and uncertainty because they relate to events and depend upon circumstances that will or may occur in the future.

Factors that could cause actual business, strategy, plans and/or results (including but not limited to the payment of dividends) to differ materially from forward looking statements made by the Group or on its behalf include, but are not limited to: general economic and business conditions in the UK and internationally; market related trends and developments; fluctuations in interest rates, inflation, exchange rates, stock markets and currencies; any impact of the transition from IBORs to alternative reference rates; the ability to access sufficient sources of capital, liquidity and funding when required; changes to the Group's credit ratings; the ability to derive cost savings and other benefits including, but without limitation as a result of any acquisitions, disposals and other strategic transactions; the ability to achieve strategic objectives; changing customer behaviour including consumer spending, saving and borrowing habits; changes to borrower or counterparty credit quality; concentration of financial exposure; management and monitoring of conduct risk; instability in the global financial markets, including Eurozone instability, instability as a result of uncertainty surrounding the exit by the UK from the European Union (EU) and as a result of such exit and the potential for other countries to exit the EU or the Eurozone and the impact of any sovereign credit rating downgrade or other sovereign financial issues; political instability including as a result of any UK general election; technological changes and risks to the security of IT and operational infrastructure, systems, data and information resulting from increased threat of cyber and other attacks; natural, pandemic (including but not limited to the coronavirus disease (COVID-19) outbreak) and other disasters, adverse weather and similar contingencies outside the Group's control; inadequate or failed internal or external processes or systems; acts of war, other acts of hostility, terrorist acts and responses to those acts, geopolitical, pandemic or other such events; risks relating to climate change; changes in laws, regulations, practices and accounting standards or taxation, including as a result of the exit by the UK from the EU, or a further possible referendum on Scottish independence; changes to

regulatory capital or liquidity requirements and similar contingencies outside the Group's control; the policies, decisions and actions of governmental or regulatory authorities or courts in the UK, the EU, the US or elsewhere including the implementation and interpretation of key legislation and regulation together with any resulting impact on the future structure of the Group; the ability to attract and retain senior management and other employees and meet its diversity objectives; actions or omissions by the Group's directors, management or employees including industrial action; changes to the Group's post-retirement defined benefit scheme obligations; the extent of any future impairment charges or write-downs caused by, but not limited to, depressed asset valuations, market disruptions and illiquid markets; the value and effectiveness of any credit protection purchased by the Group; the inability to hedge certain risks economically; the adequacy of loss reserves; the actions of competitors, including non-bank financial services, lending companies and digital innovators and disruptive technologies; and exposure to regulatory or competition scrutiny, legal, regulatory or competition proceedings, investigations or complaints. Please refer to the latest Annual Report on Form 20-F filed by Lloyds Banking Group plc with the US Securities and Exchange Commission for a discussion of certain factors and risks together with examples of forward looking statements.

Lloyds Banking Group may also make or disclose written and/or oral forward looking statements in reports filed with or furnished to the US Securities and Exchange Commission, Lloyds Banking Group annual reviews, half-year announcements, proxy statements, offering circulars, prospectuses, press releases and other written materials and in oral statements made by the directors, officers or employees of Lloyds Banking Group to third parties, including financial analysts.

Except as required by any applicable law or regulation, the forward looking statements contained in this document are made as of today's date, and the Group expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward looking statements contained in this document to reflect any change in the Group's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. The information, statements and opinions contained in this document do not constitute a public offer under any applicable law or an offer to sell any securities or financial instruments or any advice or recommendation with respect to such securities or financial instruments.

- The Group applies the full extent of the IFRS 9 transitional arrangements for capital as set out under the recent revisions to CRR Article 473a.
- Although the Group does not have a Systemic Risk Buffer (SRB), it is required to hold additional CET1 capital to meet its Ring-Fenced Bank's SRB of 2.0 per cent, which equates to 1.7 per cent of Group risk-weighted assets.
- The CRD IV leverage ratio at 30 June 2020 is 4.9 per cent (31 December 2019: 4.8 per cent).

The average UK leverage ratio for the quarter (1 April 2020 to 30 June 2020) is 5.3 per cent, compared to 5.3 per cent at the start and 5.4 per cent at the end of the quarter. The average exposure measure over the quarter is £674,641m. The countercyclical leverage buffer is currently 0 per cent.

Table 2: Key Metrics – TLAC requirements (KM2)

As the Group is not classified as a global systemically important bank (G-SIB) it is not directly subject to the CRR II MREL requirements that came into force in June 2019. However the Group remains subject to the Bank of England's MREL statement of policy (MREL SoP) and must therefore maintain a minimum level of MREL resources.

Applying the Bank of England's MREL SoP to current minimum capital requirements, the Group's indicative MREL requirement, excluding regulatory capital and leverage buffers, is as follows:

- From 1 January 2020, the higher of 2 times Pillar 1 plus Pillar 2A, currently equivalent to 20.2 per cent of risk-weighted assets, or 6.5 per cent of the UK leverage ratio exposure measure
- from 1 January 2022, the higher of 2 times Pillar 1 plus 2 times Pillar 2A, currently equivalent to 24.3 per cent of risk-weighted assets, or 6.5 per cent of the UK leverage ratio exposure measure.

In addition, CET1 capital cannot be used to meet both MREL requirements and capital or leverage buffers.

During the second half of 2020, the Bank of England will review the final end-state requirements which are to be met from 1 January 2022.

Internal MREL requirements also apply to the Group's material sub-groups and entities, including the RFB sub-group, Lloyds Bank plc, Bank of Scotland plc and Lloyds Bank Corporate Markets plc.

The metrics provided in the table below in conjunction with the more detailed disclosures in Appendix II provide information on the Group's current MREL resources at consolidated and entity levels. The disclosures are based on the Pillar 3 TLAC templates published by the Basel Committee in 2017.

Risk-weighted assets at 30 June 2020	137,756	24,046	161,802	6,539	1,953	25,437	195,731
Threshold risk-weighted assets ¹	—	—	—	—	—	—	11,321
Total risk-weighted assets as at 30 June 2020							207,052

¹ Threshold risk-weighted assets reflect the element of significant investments and deferred tax assets that are permitted to be risk-weighted instead of being deducted from CET1 capital. Significant investments primarily arise from investments in the Group's Insurance business.

² Credit risk includes securitisation risk-weighted assets.

³ Counterparty credit risk includes movements in contributions to the default funds of central counterparties and movements in credit valuation adjustment risk.

The risk-weighted assets movement table provides analysis of the movement in risk-weighted assets in the period by risk type and an insight into the key drivers of the movements. The key driver analysis is compiled on a monthly basis through the identification and categorisation of risk-weighted asset movements and is subject to management judgement.

Credit risk, risk-weighted assets:

- Asset size reduction of £2.9bn reflects reduced lending volumes in Retail portfolios with limited impact from increased lending through government supported products.
- Asset quality increases of £3.3bn primarily relate to model calibrations and an increase in credit risk, reflecting the current economic environment.
- Methodology and policy decreases of £2.1bn include the impact of the revisions to the SME scalar.

Counterparty credit risk, risk-weighted assets decreased by £0.6bn due to movements in market rates during the quarter.

Market risk, risk-weighted assets increased driven by an increase in interest rate risk exposure in the trading books. LBCM and RFB's capital multipliers both increased over H1, resulting from COVID-related backtesting overshoots. However the resulting RWA increase was partially offset as per regulator guidance.

PILLAR 1 CAPITAL REQUIREMENTS: CREDIT RISK

The following table shows the Group's credit exposures split by Basel exposure class, together with associated risk-weighted assets. Exposures are presented on a pre CRM and post CCF basis.

Table 5: Credit risk exposures

	June 2020			December 2019

¹ Non-credit obligation assets (IRB approach) and Other exposures (Standardised approach) predominantly relate to other balance sheet assets that have no associated credit risk. These comprise non-financial assets, including fixed assets, cash, items in the course of collection, prepayments and sundry debtors.

Exposures subject to the IRB approach – key movements for the six months to 30 June 2020

Central governments or central banks

– Exposures increased by £3.6bn with an increase in risk-weighted assets of £0.1bn mainly due to an increase in deposits placed with the US Federal reserve.

Institutions

– Exposures increased by £1.7bn and risk-weighted assets increased by £0.1bn mainly due to new business with lower risk weights attached.

Corporates

– Risk-weighted assets broadly flat with reductions from the revisions to the SME scalar and migrations to default offset by an increase due to credit migration in non-defaulted exposures.

Retail - Secured by real estate property

– Exposures reduced by £1.1bn due to lower demand for retail lending products. RWAs increase by £2.4bn primarily due to cyclical adjustments to models to reflect arrears profile.

Qualifying Revolving

– Exposures increased by £1.8bn due to model calibrations. Risk-weighted assets decreased by £0.9bn due to lower utilisation rates and lower defaults.

Exposures subject to the Standardised approach – key movements for the six months to 30 June 2020

Central governments or central banks

– Exposures increased by £22.9bn due to increased deposits with the Bank of England.

ANALYSIS OF CREDIT RISK EXPOSURES SUBJECT TO THE IRB APPROACH

Exposures in the tables below are stated on two different bases (gross carrying values and EAD post-CCF and CRM). On-balance sheet gross exposures and off-balance sheet exposures represent gross carrying values (before taking into account SCRAAs) before the application of CRM and CCF. Disclosures provided in the tables that follow take into account PD floors and LGD floors specified by regulators in respect of the calculation of regulatory capital requirements.

The Basel guidelines include a single prescribed scale for presenting the credit quality of all IRB portfolios by asset class. The tables that follow use this prescribed scale.

'RWA density' represents the 'average risk weight'. 'Number of obligors' corresponds to the number of individual PDs (in each band). This means that a customer may be counted more than once in the same asset class. For example, in the case of Corporate Main, as customers may have exposures in both Commercial Banking and Motor Finance portfolios, an individual corporate obligor may be counted twice.

Analysis of credit risk exposures subject to the IRB Approach

ANALYSIS OF CREDIT RISK EXPOSURES SUBJECT TO OTHER IRB APPROACHES

Exposures in the table below are stated on two different bases. On-balance sheet and off-balance sheet amounts represent net carrying values (after taking into account specific credit risk adjustments (SCRA) before the application of CRM and CCF. Exposure amount represents EAD post CRM and CCF.

Table 15A: IRB – Specialised lending (CR10)

		June 2020

ANALYSIS OF EQUITY EXPOSURES

An analysis of equity exposures and risk-weighted assets categorised under the Simple Risk Weight Method is provided in the table below.

Table 15B: Equity exposure subject to the simple risk weight method (CR10)

June 2020						
Equities under the simple risk-weight approach						
Categories	On-balance sheet amount £m	Off-balance sheet amount £m	RW %	Exposure amount £m	RWA £m	Capital requirements £m
Exchange-traded equity exposures	17	—	290%	17	48	4
Private equity exposures	2,488	100	190%	2,588	4,917	393
Other equity exposures	472	—	370%	472	1,746	140
Total	2,977	100		3,077	6,711	537

December 2019						
Equities under the simple risk-weight approach						
Categories	On-balance sheet amount £m	Off-balance sheet amount £m	RW %	Exposure amount £m	RWA £m	Capital requirements £m
Exchange-traded equity exposures	37	—	290%	37	107	9
Private equity exposures	2,567	55	190%	2,622	4,982	399
Other equity exposures	427	—	370%	427	1,578	126
Total	3,030	55		3,085	6,666	533

Analysis of credit risk exposures subject to the standardised approach

Standardised exposures in the table below are stated on two different bases (pre-CCF and CRM and post-CCF and CRM). Note, the exposures are also net of SCARs.

Table 16: Standardised approach – credit risk exposure and credit risk mitigation effects (CR4)

	June 2020					
	Exposures before CCF and CRM		Exposures post CCF and CRM		RWA and RWA density

17 Total	100,024	26,935	100,243	3,449	23,853	23%

¹ RWA density is RWA expressed as a percentage of exposures post CCF and CRM.

Table 17: Standardised approach – exposures by asset class (CR5)

Exposures in the table below are stated on a post CRM post CCF basis

Exposures are classed as “rated” only where an ECAI rating has been used to derive the risk weight. Where a rating is unavailable, or where the risk weight has been determined by application of specific CRR provisions, exposures have been classed as “unrated”. This also applies to central governments or central banks exposures within the UK and EEA that receive a zero per cent risk weight in line with regulatory permission.

Exposure Classes	June 2020															Total £m	Of which: Unrated £m

IMPAIRMENT AND CREDIT QUALITY OF EXPOSURES

The tables that follow present an analysis of credit risk exposures and credit risk adjustments (including charges in the period) analysed by regulatory exposure class and industry. Gross carrying value comprises both on and off-balance sheet exposures. Net values represent gross carrying values less specific credit risk adjustments.

The Group does not recognise any general credit risk adjustment as defined by the EBA therefore this column has been excluded from templates CR1-A and CR1-B.

Table 18: Credit quality of exposures by exposure class and instrument (CR1-A)

¹ The total of specific credit risk adjustments and credit risk adjustment charges in the period are lower than financial reporting amounts predominantly due to the differing regulatory treatment of a number of exposures and the exclusion of the £200m central overlay to the expected credit loss allowances reported in the Group's June 2020 half year news release.

² The breakdown of "exposures in default" by the exposure class that corresponds to the exposure before default, comprises Corporate £1,446m (2019: £1,288m) and Retail £681m (2019: £637m).

¹ Allocation of the carrying amount of multi-secured exposures is made by order of priority to their different CRM techniques.

² At 30 June 2020 the value of exposures secured by eligible financial collateral is £4.6bn (Dec 2019: £4.6bn) and the value of exposures secured by other eligible collateral is £363.9bn (Dec 2019: £366.8bn).

³ Exposures to Institutions secured by collateral includes £3,013m (Dec 2019: £2,253m) of exposures in the form of covered bonds.

ANALYSIS OF PERFORMING, NON-PERFORMING AND FORBORNE EXPOSURES

The exposures in the tables that follow have been prepared in accordance with FINREP definitions and as such the loans and debt securities include balances subject to the credit risk, counterparty credit risk and securitisation frameworks.

Table 21: Credit quality of forborne exposures (CQ1)

June 2020										
	a	b	c	d	e		f	g		h
	Gross carrying amount/nominal amount of exposures with forbearance measures				Accumulated impairment, accumulated negative changes in fair value due to credit risk and provisions			Collateral received and financial guarantees received on forborne exposures		
	Performing Forborne	Non-performing	Of Which:		On performing forborne exposures	On non-performing forborne exposures			Of which collateral and financial guarantees received on non-performing exposures with forbearance measures	
			Defaulted	Impaired

6	of which: Collateralised by commercial immovable property	3,509	3,404	35	9	105	105	105	59	55	1	1	4	4	4	105

1. Reported numbers exclude a small number of St. James Place, Intelligent Finance and Tesco mortgage portfolio repayment holidays; and a small number of Lex Autolease motor finance payment holiday.
2. For some retail customers payment holidays have been granted in respect of lending which was classified as non-performing at the time the payment holiday was granted.
3. Reported values for Mid and Large Corporates are based on customer's total hard limits including related to wider facilities. Based on this the actual in force capital repayment holiday for these clients is a lower number than stated above.

Payment holidays have been granted across a range of retail products including mortgages, personal loans, credit cards and motor finance. Capital and interest payments are typically suspended for the duration of the holiday, but interest continues to accrue. For the purposes of this reporting the end of the payment holiday is defined as the first date on which payment is due after the payment holiday period ends. Capital repayment holidays in Commercial Banking are defined as periods during which customers are not required to make repayments of capital against drawn term loan facilities. Customers are required to continue making interest payments, and the capital repayment holiday is reflected in an extension to the term of the facility.

		Of which: legislative moratoria	Of which: expired	Residual maturity of moratoria					
				<= 3 months	> 3 months <= 6 months	> 6 months <= 9 months	> 9 months <= 12 months	> 1 year	
£m									
1 Loans and advances for which moratorium was offered	999,715	69,879							
2 Loans and advances subject to moratorium (granted)	999,715	69,879	69,879	3,272	56,022	10,365	135	22	64
3 of which: Households		60,245	60,245	3,126	52,346	4,774	—	—	—
4 of which: Collateralised by residential immovable property		55,679	55,679	2,371	48,628	4,680	—	—	—
5 of which: Non-financial corporations		9,459	9,459	146	3,658	5,435	135	22	64
6 of which: Small and Medium-sized Enterprises		5,370	5,370	39	486	4,752	89	3	2
7 of which: Collateralised by commercial immovable property		3,509	3,509	—	181	3,267	56	3	2

¹ Reported numbers exclude a small number of St. James Place, Intelligent Finance and Tesco mortgage portfolio repayment holidays; and a small number of Lex Autolease motor finance payment holiday.

² Exposures Reported values for Mid and Large Corporates are based on customer's total hard limits including related to wider facilities. Based on this the actual in force capital repayment holiday for these clients is a lower number than stated above.

Payment holidays of up to three months have been granted to retail customers, with further extensions of up to three months available on request. For commercial customers mid-term Capital Repayment Holidays have been granted, typically of up to 6 months although in a very small number of cases longer payment holidays have been granted. Further extensions of up to 3 months may be granted subject to eligibility criteria being met.

As at 30 June LBG had issued over £6.2billion of Bounce Back Loans with an average value of £30,000 and maturity of c.6 years. In addition CBILs of £1.4billion had been issued, with average value of £220,000 and average maturity of c. 6 years. £0.1billion of CLBILs had also been issued. Lending is across a wide range of sectors.

PILLAR 1 CAPITAL REQUIREMENTS: COUNTERPARTY CREDIT RISK

– Counterparty credit risk (including CVA) represents 3.2 per cent (2019: 2.9 per cent) of the Group's total risk-weighted assets.

Table 35: Standardised approach – CCR exposures by regulatory portfolio and risk (CCR3)

Exposures are classed as “rated” only where an ECAI rating has been used to derive the risk-weight. Where a rating is unavailable, or where the risk weight has been determined by application of specific CRR provisions, exposures have been classed as “unrated”. Only those exposure classes where standardised CCR exposures are held have been included.

Exposure Classes ¹	June 2020												Total £m	Of which: Unrated £m

Total	1,953	156	1,790	143

Table 40: Risk-weighted assets flow statements of market risk exposures under an IMA (MR2-B)

	VaR £m	SVaR £m	IRC £m	CRM £m	Other £m	Total RWA £m	Total Capital Requirements £m
¹ Risk-weighted assets as at 31 December 2019	227	707	138	—	439	1,511	121
² Movement in risk levels	10	176	(11)	—	(75)	101	8
³ Model updates/changes	59	222	—	—	21	303	24
⁴ Methodology and policy	—	—	—	—	(277)	(277)	(22)
⁵ Acquisitions and disposals	—	—	—	—	—	—	—
⁶ Foreign exchange movements	—	—	—	—	—	—	—
⁷ Other	—	—	—	—	—	—	—
Asset size	—	—	—	—	—	—	—
⁸ Risk-weighted assets as at 30 June 2020	297	1,105	127	—	109	1,638	131

Internal model approach risk-weighted assets increased driven by an increase in interest rate risk exposure in the trading books. LBCM and RFB's capital multipliers both increased over H1, resulting from COVID-related backtesting overshoots. However the resulting RWA increase was partially offset as per regulator guidance.

Table 41: Comparison of VaR estimates with gains/losses (MR4)

The chart below provides a comparison of VaR (1-day 99 per cent confidence level) to the hypothetical and actual profit and loss on a daily basis over the six months to June 2020 for Lloyds Bank Group.

Note that the profit and loss used in back-testing is not reflective of the total profit and loss from the trading book as it excludes items such as fees and commissions.

For Lloyds Bank Group there were 7 actual loss back-testing overshoots and 8 hypothetical loss overshoot in the six months to June 2020 which were driven by increased market volatility from the COVID-19 virus.

For Lloyds Bank Corporate Markets there were 3 actual loss back-testing overshoots and 8 hypothetical loss overshoot in the six months to June 2020 which were driven by increased market volatility from the COVID-19 virus.

APPENDIX II - Total Loss Absorbing Capacity

The following table is based on the Basel Committee Pillar 3 template "TLAC 1" and presents the composition of the Group's MREL resources as at 30 June 2020.

Table 49: Total loss absorbing capital composition

	At 30 June 2020	At 31 Dec 2019
	Resolution Group	Resolution Group
	£m	£m
Regulatory capital elements of TLAC and adjustments		
1 Common equity tier 1 (CET1) capital	30,189	27,744
2 Additional tier 1 (AT1) capital before TLAC adjustments	5,842	6,248
3 AT1 ineligible as TLAC as issued out of subsidiaries to third parties ¹	—	—
4 Other adjustments ²	(35)	—
5 AT1 instruments eligible under the TLAC framework	5,807	6,248
6 Tier 2 (T2) capital before TLAC adjustments	10,115	9,424
7 Amortised portion of T2 instruments where remaining maturity > 1 year	115	24
8 T2 capital ineligible as TLAC as issued out of subsidiaries to third parties ¹	—	—
9 Other adjustments ²	(518)	(874)
10 Tier2 instruments eligible under the TLAC framework	9,712	8,574
11 TLAC arising from regulatory capital	45,708	42,566
Non-regulatory capital elements of TLAC		
12 External TLAC instruments issued directly by the bank and subordinated to excluded liabilities	30,567	23,554
13 External TLAC instruments issued directly by the bank which are not subordinated to excluded liabilities but meet all other TLAC Term Sheet requirements	—	—
14 Of which: amount eligible as TLAC after application of the caps	—	—
15 External TLAC instruments issued by funding vehicles prior to 1 January 2022	—	—
16 Eligible ex ante commitments to recapitalise a G-SIB in resolution	—	—
17 TLAC arising from non-regulatory capital instruments before adjustments	30,567	23,554
Non-regulatory capital elements of TLAC: adjustments		
18 TLAC before deductions	76,275	66,120
19 Deductions of exposures between MPE resolution groups that correspond to items eligible for TLAC (not applicable to single point of entry G-SIBs)	—	—
20 Deduction of investments in own other TLAC liabilities	—	—
21 Other adjustments to TLAC	—	—
22 TLAC after deductions	76,275	66,120
Risk-weighted assets (RWA) and leverage exposure measure for TLAC purposes		
23 Total RWA adjusted as permitted under the TLAC regime	207,052	203,431
24 UK leverage exposure measure	665,789	654,387
TLAC ratios and buffers		
25 TLAC (as a percentage of RWA adjusted as permitted under the TLAC regime)	36.8%	32.5%
26 TLAC (as a percentage of UK leverage exposure)	11.5%	10.1%
27 CET1 (as a percentage of RWA) available after meeting the resolution group's minimum total capital and TLAC requirements³	7.8%	6.5%
28 Institution-specific buffer requirement (capital conservation buffer plus countercyclical buffer requirements plus higher loss absorbency requirement, expressed as a percentage of RWA)	2.5%	3.4%
29 Of which: capital conservation buffer requirement	2.5%	2.5%
30 Of which: bank specific countercyclical buffer requirement	0.0%	0.9%
31 Of which: higher loss absorbency requirement ⁴	—	—

¹ Until 2022, externally issued regulatory capital in operating entities can count towards the Group's MREL to the extent that such capital would count towards the Group's consolidated capital resources.

² Instruments with less than or equal to one year to maturity or governed under non-EEA law without a contractual bail-in clause.

³ Defined as CET1 remaining after meeting the total capital requirement i.e Pillar 1 and Pillar 2A

⁴ Although the Group does not have a Systemic Risk Buffer (SRB), it is required to hold additional CET1 capital to meet its Ring-Fenced Bank's SRB of 2.0 per cent, which equates to 1.7% of Group risk-weighted assets.

Table 50: Material sub-group entity - creditor ranking at legal entity level

The following disclosures, based on the Basel Committee Pillar 3 template "TLAC 2", provide information on the creditor hierarchy for each material entity within the resolution group, including Lloyds Bank plc, Bank of Scotland plc and Lloyds Bank Corporate Markets plc.

The disclosures include information on the nominal value of all MREL eligible instruments and other liabilities to the extent that they are subordinate to or rank pari passu with the most senior MREL eligible claim. Where the instrument is denominated in foreign currency, the nominal value is converted into sterling using the rate as at 30 June 2020.

For ordinary shares, this excludes the value of share premium and reserves attributable to ordinary shareholders.

Table 51: Resolution entity – creditor ranking at legal entity level

The following disclosure, based on the Basel Committee Pillar 3 template “TLAC 3”, provides information on the creditor hierarchy for the resolution entity (Lloyds Banking Group plc).

The disclosure includes information on the nominal value of all MREL eligible instruments and other liabilities to the extent that they are subordinate to or rank pari passu with the most senior MREL eligible claim. Where the instrument is denominated in foreign currency, the nominal value is converted into sterling using the rate as at 30 June 2020.

For ordinary shares, this excludes the value of share premium and reserves attributable to ordinary shareholders.

TEMPLATES NOT DISCLOSED

Certain quantitative EBA templates prescribed on a semi-annual basis are not applicable to the Group. These include INS1 (Non-deducted participations in insurance undertakings) and CCR7 (RWA flow statements of CCR exposures under the IMM).

CR2-A (Changes in the stock of general and specific credit risk adjustments) is met through the disclosure of Note 11 (Allowance for impairment losses) of the Group's 2019 half-year results. CR8 (RWA flow statements of credit risk exposures under the IRB approach) is met through the disclosure of Table 4: Risk-weighted assets movement by key driver.

CR2-B (Changes in the stock of defaulted and impaired loans and debt securities) has been excluded as the requirement is beyond what is required by the CRR.

Article 432 of the CRR on non-material, proprietary or confidential information permits institutions to omit one or more disclosures if the information provided by such a disclosure is not regarded as material. The following templates have been omitted on the grounds that they are non-material: CR1-C (Credit quality of exposures by geography) as we are a predominantly UK focused bank; CR7 (IRB approach – effect on the RWAs of credit derivatives used as CRM); MR1 (Market risk under the standardised approach); MR2-A (Market risk under the IMA approach) and MR3 (IMA values for trading portfolios).
