Robust financial results with resilient credit performance and continued business momentum

- Maintaining support for customers and progressing strategic priorities with significant strategic investment
- Supporting the transition to a low carbon economy; announced new sector-based 2030 emissions reduction targets and new net zero ambition for supply chain in our Net Zero Activity Update
- Statutory profit after tax of £4.0bn, with higher net income more than offset by impairment charges as a result of the revised economic outlook (versus a significant write-back in 2021)
- Robust revenue growth supported by continued recovery in customer activity and UK Bank Rate changes. Net income of £13.0bn, up 12%
- Underlying net interest income up 15%, significantly driven by a stronger banking net interest margin of 2.84% year to date (2.98% in the third quarter)
- Operating costs of £6.4bn, up 6%, reflecting stable business-as-usual costs alongside higher planned strategic investment and new businesses
- Underlying profit before impairment up 29% to £6.5bn (£2.4bn in the third quarter), given robust net income growth

Continued franchise growth and strong capital generation

- Loans and advances to customers at £456.3bn were up £7.7bn in the first nine months and up £0.2bn in the quarter, with continued growth in the open mortgage book
- Customer deposits of £484.3bn were up £8.0bn in the first nine months and £6.1bn in the quarter. Loan to deposit ratio of 94% continues to provide robust funding and liquidity and potential for growth
- Capital generation of 191bps in the first nine months of 2022
- Capital generation now expected to be between 225 and 250bps
- Observed asset quality remains strong and the portfolio is well-positioned in the context of cost of living pressures. Underlying impairment of £1.0bn (of which £0.7bn was recognised in the third quarter) reflects a resilient observed credit performance, but impacted by the weakening economic outlook and associated scenarios in the third quarter, partially offset by COVID-19 releases

Outlook

Given the robust financial performance in the first nine months of 2022 and incorporating revised macroeconomic forecasts in the third quarter, the Group is updating its 2022 guidance:

- Banking net interest margin now expected to be greater than 290bps
- Operating costs expected to be c.£8.8bn
- Asset quality ratio now expected to be c.30bps
- Return on tangible equity expected to be c.13%
- Risk-weighted assets at the end of 2022 expected to be c.£210bn
- Capital generation now expected to be between 225 and 250bps
