LLOYDS BANKING GROUP PLC Disclosure for Global systemically important banks (G-SIB) Indicators as of 31 December 2024

While Lloyds Banking Group is not currently classified as a G-SIB, it is within a sample of banks required to report these metrics to the national supervisory authority, the Prudential Regulation Authority, and as such is required to disclose these indicators.

The Basel Committee on Banking Supervision (BCBS) assesses the systemic importance of banks in a global context. Global systemic importance is measured in terms of the impact a bank's failure can have on the global financial system and the wider economy, rather than the risk that a failure could occur.

The measurement approach of the global systemic importance is indicator-based. The indicators shall reflect the size of banks, their interconnectedness, the lack of readily available substitutes or financial institution infrastructure for the services they provide, their global (cross-jurisdictional) activity and their complexity. The methodology is outlined in the July 2013 document entitled 'Global systemically important banks: updated assessment methodology and the higher loss absorbency requirement'.

The data disclosed is on a regulatory consolidation basis, and as such includes the insurance business of the Group. In addition the data is based on specific instructions issued by the BCBS on 23 January 2024, and thus is not always directly comparable against other disclosed information.
