**Glossary:**

<b>Arrears</b>	Arrears are calculated in accordance with standard market practice in the UK. A mortgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates equal, in the aggregate, one or more full monthly payments. In making an arrears determination, the servicer calculates as of the date of determination the difference between the sum of all monthly payments that were due and payable by a borrower on any due date up to that date of determination (less the aggregate amount of all authorised underpayments made by such borrower up to such date of determination) and the sum of all payments actually made by that borrower up to that date of determination. If the result arrived at by dividing that difference (if any) by the amount of the required current monthly payment equals or exceeds 1 the account is deemed to be in arrears. Arrears classification is determined based on the number of equivalent full current monthly payments that have been missed. A borrower that has missed payments that in the aggregate equal or exceeding 2 monthly payments (but for which the aggregate of missed payments is less than 3 monthly payments) would be classified as being 2 to <3 months in arrears, and so on. For the purpose of the Asset Coverage Test, an account is treated as being in default if it is 3 or more months in arrears.
<b>Monthly Constant Pre-Payment Date (CPR)</b>	Monthly CPR on any portfolio calculation date means the total unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio property as at the immediately preceding calculation date. Unscheduled Principal Repayments comprise payments from Lloyds Bank plc for the repurchase of loans from the portfolio, and capital repayments and redemptions other than those received at the expected term end date of the loan. Where there has been portfolio transfers within the month, CPR is calculated on a weighted average basis.
<b>Monthly Principal Payment Rate (PPR)</b>	Monthly PPR on any portfolio calculation date means the total scheduled and unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio property as at the immediately preceding portfolio calculation date. Where there has been portfolio transfers within the month, PPR is calculated on a weighted average basis. These are annualised using the formula: $1 - ((1 - M)^{12})$ where M is the monthly CPR or PPR expressed as a percentage. Please note that CPR, as defined in the programme documentation, corresponds with PPR within this Investor Report.
<b>Quarterly Average CPR/PPR</b>	The average of the three most recent monthly annualised CPR / PPR expressed as a percentage.
<b>Amount (GBP)</b>	In relation to any Loan at any date (the current balance determination date), the aggregate at such date (but avoiding double counting) of: (i) the Initial Advance; (ii) Further Advances and/or Flexible Loan Drawings; (iii) Capitalised Expenses; (iv) Capitalised Interest; and (v) all expenses, charges, fees, premium or payment due and owing by the Borrower which have not yet been capitalised, in each case relating to such Loan less all prepayments, repayments or payments of any of the foregoing made on or prior to the amount balance determination date; and in relation to any Mortgage Account at the amount balance determination date, the aggregate at such date of the Amount balance in respect of each Loan comprised in the relevant Mortgage Account
<b>Mortgage Collections</b>	All cash receipts on a mortgage within the portfolio excluding monies paid by Lloyds Bank plc in respect of loans repurchased from the portfolio.
<b>Non-indexed LTV</b>	The aggregate current balance of all sub-loans within a mortgage account divided by the value of the property securing the loans in that mortgage account at the date of the latest lending.
<b>Loan Seasoning</b>	The number of months since the date of origination of the sub-loan.
<b>Remaining Term</b>	The number of remaining months of the term of each sub-loan.
<b>Indexed LTV</b>	The aggregate current balance of all sub-loans within a mortgage account divided by the indexed valuation of the property securing the loans in that mortgage account at the reporting date.
<b>Indexed Valuation</b>	Indexation is applied on a regional basis to property valuations on a quarterly basis in January, April, July and October of each year using the Halifax House Price Index.
<b>Interest Payment Type</b>	Status at month end.
