Lloyds Bank GmbH

Update following upgrade of deposit ratings

Summary

Lloyds Bank GmbH's (LB GmbH) ratings reflect its baa2 BCA, two notches of affiliate support uplift, which is based on the assumption of very high support from its 100% owner Lloyds Bank plc (A1 stable/A1 stable, a3¹) and results an a3 Adjusted BCA; and one notch rating uplift for LB GmbH's deposit ratings from our Advanced Loss Given Failure (LGF) analysis, which incorporates the relative loss severity of a liability class. We do not incorporate rating uplift from government support because of the bank's small size in the context of the German banking sector.

LB GmbH's baa2 BCA reflects its strong asset quality and risk-weighted capitalization, which help offset risk from its concentrated lending book and an unseasoned loan book amid strong growth, albeit its leverage ratio of below 4% is a weakness. Further, LB GmbH's proven access to granular retail deposits is a relative strength, although the focus on online deposits sourced mostly in Germany is largely decoupling the deposit base from its predominantly Dutch lending franchise which could reduce the bank's ability to source cheap funding and maintain adequate liquidity ratios and is indicative of a more price-sensitive customer base. Further, LB GmbH's quasi-monoline business model and the resulting limited business diversification remains captured in the baa2 BCA.

Exhibit 1

Rating Scorecard - Lloyds Bank GmbH - Key ratios

	Lloyds Bank GmbH (BCA: baa2)	Median baa2-rated banks
Solvency Factors		
Asset Risk	0.4%	1.9%
Capital	19.7%	16.1%
Profitability	0.4%	0.9%
Liquidity Factors		
Funding Structure	15.9%	18.7%
Liquid Resources	12.9%	17.8%

Source: Moody's Ratings

Credit strengths

- » Granular loan book with sound asset quality
- » Access to mostly statutorily guaranteed granular retail deposits
- » Strong strategic and operational linkage with parent bank

Credit challenges

- » Strong business focus results in lack of income diversification
- » High balance-sheet leverage
- » Limited liquid resources
- » Deposit franchise faces increasing competition and remains decoupled from the bank's lending assets

Rating outlook

- » The stable outlook on the long-term bank deposit ratings reflects our expectation of a largely stable financial profile. We also expect the bank's liability structure to remain broadly unchanged over the next 12-18 months.

Factors that could lead to an upgrade

- » LB GmbH's ratings could be upgraded if the BCA of Lloyds Bank plc gets upgraded. In addition, LB GmbH's ratings may benefit from additional rating uplift from our Advanced LGF analysis through meaningful issuance of senior unsecured and subordinated debt instruments.
- » LB GmbH's BCA could be upgraded if the bank significantly improves its leverage ratio and sustainably bolsters its cash and liquidity reserves while maintaining a low dependence on more confidence-sensitive market funding. However, this is very likely to be offset by a reduction in affiliate support unless Lloyds Bank plc's BCA improves as well.

Factors that could lead to a downgrade

- » LB GmbH's ratings could be downgraded if the bank's BCA is downgraded or if Lloyds Bank plc's BCA is downgraded, leading to fewer notches of affiliate support uplift. LB GmbH's ratings could also be downgraded if changes in its liability structure towards non-bail-able instruments indicate a higher loss severity for certain instrument classes from our Advanced LGF analysis.
- » LB GmbH's BCA could be downgraded if its combined solvency weakens, for example because of an increase in non-performing loans or decrease of its leverage ratio. The BCA could also be downgraded if the bank increases its market funding dependence beyond the rating agency's current expectation or in case of a sustainably reduced level of liquidity reserves.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

Profile

LB GmbH is a German bank based in Berlin with €27.0 billion in total assets as of 31 December 2025 with an office in Amsterdam. The bank was founded in 2019 through the asset transfer of the Dutch and German branch of Bank of Scotland plc (A1 stable/A1 stable, a3²) and is now a fully owned subsidiary of Lloyds Bank plc.

LB GmbH is an online direct bank with a focus on retail banking products. In Germany, it advertises its deposits and retail lending products under the "Bank of Scotland" brand whereas in the Netherlands it uses the "Lloyds Bank" brand. As of year-end 2025, most of its loan book consisted of Dutch residential mortgages distributed through brokers, while the deposits funding the loan book mainly consisted of German retail deposits generated through online distribution channels.

As of year-end 2025, the bank had around 700 employees and about 1.1 million customers in the Netherlands and Germany translating into a market share of 2.4% in the residential mortgage market in the Netherlands.

Detailed credit considerations

Strong loan growth and concentrations in residential mortgage lending drive asset risks

We assign an a1 asset risk score that reflects our Problem Loans to Gross Loans ratio of 0.4%, which we consider to be very strong. The assigned score is adjusted because of the bank's very strong loan growth and the resulting unseasoned credit risk, and its concentration to the Dutch residential mortgage market.

This strong concentration to the Dutch residential mortgage market is partially mitigated by the fact that around 50% of those loans are guaranteed by the National Mortgage Guarantee (NHG), effectively eliminating related credit risks. NHG is a guarantee provided to the mortgage lender by a government-backed foundation, the Dutch Homeownership Guarantee Fund (Stichting Waarborgfonds Eigen Woningen). In 2025, NHG loans were applicable for mortgages up to a volume of €450,000. The maximum loan amount will increase to €470,000 in 2026.

The bank's loan book expanded by 15.6% year-on-year in 2025, reaching €23.3 billion and remaining predominantly composed of mortgages. To enhance its positioning in the highly competitive Dutch lending market, LB introduced loans with 100% loan-to-value (LTV) ratios for non-NHG mortgages in Q4 2025. In addition, it raised its LTV thresholds in Germany and entered the buy-to-let mortgage segment. While the shift in risk appetite has not yet translated into higher problem loans, the share of non-NHG loans has now exceeded that of NHG loans. Mortgage exposures remain geographically well diversified across the Netherlands and Germany.

Exhibit 3

LB GmbH's asset quality remains strong

■ Problem loan ratio (LHS) — Problem loan coverage (RHS)

Problem loan ratio is in accordance with our definition; the coverage ratio compares problem loans to specific and generic loan-loss reserves.

Sources: Company reports, Moody's Ratings

As of year-end 2025, the bank's stock of impaired loans increased to €82 million as at December 2025 (2024: €68 million) but the problem loan ratio (as expressed as percentage of total gross loans) remained low with 0.4% because of the strong growth in gross loans. The bank's cash coverage of problem loans of 58% as of year-end 2025 is considered solid despite ongoing declines since 2023 and in line with most peers.

High balance-sheet leverage implies some vulnerability, despite strong risk-weighted capitalisation

We assign a baa1 score for capital, which reflects our Tangible Common Equity (TCE) to Risk Weighted Assets ratio of 19.7% and is considered to be strong, absent consideration of the bank's leverage ratio. The assigned score is adjusted for low nominal balance sheet leverage and the application of the Internal Rating Based Approach (IRBA) for calculating most of the bank's risk-weighted assets (RWA). It further reflects ongoing substantial loan growth and the upcoming implementation of risk floors under the capital requirements regulations (CRR) 3 which will increase RWA and reduce the bank's capital ratios.

LB GmbH applies the internal rating-based approach for calculating its risk-weighted assets relating to Dutch mortgage loans while it utilises the standard approach for calculating risk-weighted assets for unsecured consumer loans, revolving credit facilities and Dutch buy-to-let mortgages.

Exhibit 4

LB GmbH's capitalisation remains strong, but leverage is very high

■ 2023 ■ 2024 ■ 2025

Sources: Company reports, Moody's Ratings

LB GmbH's TCE leverage ratio remains low by displaying 3.5% as at December 2025. The bank's regulatory leverage ratio stood at 3.8% as of the same date, supported by €60 million of Additional Tier 1 (AT1) instruments held by the parent. This resulting buffer to the 3.0% regulatory leverage ratio requirement is lower than for many peers, exposing the bank to potentially nearing its regulatory minimum if future growth is not supported by an almost full retention of earnings coupled with the issuance of additional equity. If sustained, this could exert strain on the bank's solvency profile, in particular if upcoming regulation or asset quality deterioration coupled with continued strong balance growth lead to higher-than-anticipated growth in risk-weighted assets and/or leverage exposures.

As of December 2025, LB GmbH's TCE ratio stood at 19.7%, down from 21.8% as of December 2024. The TCE ratio was in line with the regulatory Common Equity Tier 1 (CET1) ratio of 19.7% as of the same date and remained well above the bank's respective capital requirements of 9.7%. The bank's CET1 ratio has improved in January 2026 to 21.3% on the back of the issuance of €75 million of core capital to support balance sheet growth.

The increased capital requirements the German regulator BaFin imposed in June 2024 following findings from a supervisory review focused on the bank's lending activities and outsourcing arrangements remained as at December 2025. We understand that the bank has already addressed the identified issues. However, the capital add-on will remain in effect until BaFin has issued an update on the capital requirements. Notwithstanding the higher capital requirements, we expect LB GmbH to continue maintaining robust capital buffers above the minimum thresholds.

Strong efficiency and stable return on assets despite reliance on interest income

We assign a ba1 score for profitability, which reflects our Net Income to Tangible Assets ratio of 0.4% and is considered to be relatively weak. The assigned score is adjusted for our expectation of stable returns on assets of 40–50 basis points (bp) over the foreseeable future, which we view as a neutral consideration.

LB GmbH's main source of income is net interest income (NII) generated from its mortgage lending activities in the Netherlands while interest expenses largely relate to its deposits franchise in Germany. The bank further holds interest rate swaps with the parent group to manage its interest rate risk from maturity mismatches. Over the next 12 months and likely beyond, we expect NII to be strained by higher deposit funding costs in a highly competitive market, in part offset by continued high loan growth.

Given the bank's business model as direct bank with no expensive branch network, its profitability benefits from a low fixed cost base. However, personnel expenses have risen in recent years which led to an increase in the cost-to-income ratio (CIR) to 43% as at December 2025 (2024: 39%). Despite risen costs in recent years, the bank's CIR compares well with peers.

Exhibit 5

Net income returns to pre-2023 levels; margins narrow

■ Net income % Tangible assets (LHS) — NIM (RHS)

Sources: Company reports, Moody's Ratings

Solid online deposit franchise complemented by long-term market funding

We assign an a1 score for funding structure, reflecting our Less Stable Funds to Tangible Banking Assets ratio of 15.9%, which we consider to be strong. The assigned score is adjusted for expected trend as we expect the bank to maintain a broadly stable funding mix with a focus on retail deposits and complementary long-term covered bond and residential mortgage backed securities (RMBS) issuances.

LB GmbH's funding largely stems from retail deposits sourced through its online distribution channels under the "Bank of Scotland" brand. We consider online deposits less sticky compared to branch-based accounts and much more price sensitive than current accounts. As at December 2025, the bank held €17.5 billion of customer deposits (2024: €15.9 billion), representing 65% of total assets. The remaining funding consisted of €0.9 billion of residential mortgage-backed securities (RMBS) and €1.0 billion of covered bonds, as well as interbank funding of €2.5 billion, the latter almost exclusively provided by the parent.

Exhibit 6

LB GmbH's deposits dominate the current funding mix, supported by long-term market funds including covered bonds

Sources: Company reports, Moody's Ratings

The issuance of longer-term funding like covered bonds and RMBS has helped to diversify the bank's funding mix and extended its funding tenors, as well as reduced funding from (and interest hedging with) the parent.

As of year-end 2025, LB GmbH's net stable funding ratio stood at 133% and its loan-to-deposit ratio was 121%.

Adequate liquid resources

We assign a baa2 score for liquid resources, reflecting our Core Banking Liquidity to Tangible Banking Assets ratio of 12.9%, which we consider to be moderate. The assigned score reflects the expected trend of stable Core Banking Liquidity and the quality of liquid assets.

Considering its loan-to-deposit ratio of well above 100% as at December 2025, the bank has limited flexibility to manage larger and unexpected deposit outflows as long as it has not established a sustainably proven access to other sources of (market) funding. This exposes it to higher funding costs to retain or grow deposits in a highly competitive market to fund its lending operations, a credit negative. In case of stress, however, we would expect the parent to provide the necessary funding, limiting overall refinancing risks.

As of year-end 2025, LB GmbH held interbank claims with central banks of €3.5 billion that we reflect in our Core Banking Liquidity ratio of 12.9%, which is in line with peers. Over the next 12 to 18 months, we expect the Core Banking Liquidity to remain stable because it is forecast that the bank's further loan growth will be funded by either retail deposits or the issuance of covered bonds or RMBS.

Exhibit 7

LB GmbH's liquid resources are moderate

Sources: Company reports, Moody's Ratings

Weighted Macro Profile of Strong (+)

We assign a Strong+ Macro Profile to LB GmbH, reflecting its primary focus on the [Netherlands](#), particularly the Dutch residential mortgage market, which accounts for the vast majority of its exposures (94%), alongside only limited lending exposures in [Germany](#) (6%). This geographic concentration anchors the bank's operating environment in highly rated, stable European economies.

The Netherlands' Strong+ macro profile, which dominates LB GmbH's exposures, reflects a wealthy, diversified and competitive economy supported by strong institutions, although elevated private-sector leverage and high household mortgage debt constrain credit conditions. These risks are partly mitigated by solid savings and improved funding structures, with access to covered bonds and securitisation supporting liquidity despite structurally lower deposit availability. Germany's Strong+ macro profile, representing a smaller share of exposures, benefits from a large and diversified economy and very strong institutions, although it is moderated by weaker credit conditions and relatively high commercial real estate exposures, while funding remains supported by a strong deposit base and good market access.

Strong business focus results in lack of income diversification constraining the bank's BCA

We assign a minus one notch qualitative adjustment for Business and Geographic Diversification, reflecting the bank's lack of income diversification outside of its narrowly distributed largely Dutch real estate lending business. LB GmbH's revenue depend almost exclusively on this business line generating a very high share of the bank's net interest income and revenue. Therefore, we consider LB GmbH to operate a monoline business model, evidencing a lack of business diversification compared to more typical business models in banking.

Business and Geographic Diversification is an important gauge of a bank's sensitivity to stress in a single business line. It is related to earnings stability in the sense that earnings diversification across distinct and relatively uncorrelated lines of business increases the reliability of a bank's earnings streams and its potential to absorb shocks affecting a business line.

ESG considerations

Lloyds Bank GmbH's ESG credit impact score is CIS-2

Exhibit 8

ESG credit impact score

Source: Moody's Ratings

LB GmbH's **CIS-2** indicates that ESG considerations have no material impact on the current ratings. This reflects the limited credit impact of environmental and social risk factors on the ratings to date, and low governance risks.

Exhibit 9

ESG issuer profile scores

Source: Moody's Ratings

Environmental

LB GmbH faces low exposure to environmental risks, which is lower than the average of its industry. The group has limited exposure to carbon transition risks because its loan book is highly concentrated in Dutch residential mortgages.

Social

LB GmbH faces moderate social risks related to customer relations as well as to demographic and societal trends and require high compliance standards. The high focus on mis-selling and misrepresentation by regulators in the Netherlands and Germany is mitigated by well-developed policies and procedures - in conjunction with Lloyds Banking Group plc - and is supported by LB GmbH's focus on plain-vanilla, transparent financial products and services for its clientele. The bank's high cyber and personal data risks are mitigated by technology solutions and organizational measures to prevent data breaches.

Governance

LB GmbH's governance risk is low. LB GmbH faces low governance risks, despite concentration risks inherent in its business model as a regionally focused mortgage lender. The bank's risk management, policies and procedures are embedded within those of the parent banking group and in line with industry practices. LB GmbH embeds conservative, risk-focused and risk-aware financial policies, and up-to-date corporate governance practices. The bank has a clear and simple organizational structure with no identified concerns regarding ownership and control. Because LB GmbH is fully controlled by Lloyds Banking Group plc, and despite its relatively small size, we have aligned the subsidiary's board structure, policies and procedures as well as the organizational structure score with that of its parent, given the bank's strategic importance and public affiliation with the group.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Affiliate support

Our considerations of a very high affiliate support from LB GmbH's direct parent Lloyds Bank plc results in two notches of rating uplift and an Adjusted BCA of a3. The very high support assumption is based on the strategic fit and the close operational integration of LB GmbH into Lloyds Banking Group plc (LBG, A3 stable, a3)³. We also incorporate the 100% ownership by Lloyds Bank plc; additional financial interlinkages with its parent; and the brand similarity in our support assumption.

Loss Given Failure analysis

Domiciled in Germany, LB GmbH is subject to the EU's Bank Recovery and Resolution Directive (BRRD), which we consider an operational resolution regime. We assume the proportion of deposits considered junior at 10%, below our standard assumption of 26%, because of the bank's largely retail-oriented depositor base. All other assumptions are in line with our standard assumptions.

Our Advanced LGF analysis reflects that full depositor preference over senior debt creditors will be implemented in the EU by early 2028.

Our Advanced LGF analysis incorporates our expectation that the bank maintains sufficient amounts of parent funding in the form of intragroup loans providing protection to more senior ranking liabilities. In line with the insolvency hierarchy for banks domiciled in Germany we consider these long-term intragroup liabilities, representing a shareholder loan, to rank below junior senior unsecured instruments.

Our Advanced LGF analysis indicates a low loss severity for depositors which results in one notch of rating uplift for deposits.

Government support considerations

We do not incorporate any rating uplift from government support to LB GmbH because of its small size in the context of the German banking sector.

Rating methodology and scorecard factors

The principal methodology we use in rating LB GmbH is the [Banks Methodology](#), published in November 2025.

About Moody's Bank Scorecard

Our Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our Scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The Scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT. FOR CLARITY, NO INFORMATION CONTAINED HEREIN MAY BE USED TO DEVELOP, IMPROVE, TRAIN OR RETRAIN ANY SOFTWARE PROGRAM OR DATABASE, INCLUDING, BUT NOT LIMITED TO, FOR ANY ARTIFICIAL INTELLIGENCE, MACHINE LEARNING OR NATURAL LANGUAGE PROCESSING SOFTWARE, ALGORITHM, METHODOLOGY AND/OR MODEL.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND MATERIALS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating or assessment is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating or assessment process or in preparing its Materials.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating or assessment assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and all MCO entities that issue ratings under the "Moody's Ratings" brand name ("Moody's Ratings"), also maintain policies and procedures to address the independence of Moody's Ratings' credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at ir.moody.com under the heading "Investor Relations — Corporate Governance — Charter and Governance Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V., I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., Moody's Local PA Clasificadora de Riesgo S.A., Moody's Local CR Clasificadora de Riesgo S.A., Moody's Local ES S.A. de CV Clasificadora de Riesgo, Moody's Local RD Sociedad Clasificadora de Riesgo S.R.L. and Moody's Local GT S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore.

EU: In the European Union, each of Moody's Deutschland GmbH and Moody's France SAS provide services as an external reviewer in accordance with the applicable requirements of the EU Green Bond Regulation. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used

within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
