These revenues vary for each account based on the type and volume of activity for each account. The historical yield figures in these tables are calculated on an accrual basis. Collections of Receivables included in Penarth Receivables Trust will be on a cash basis and may not reflect the historical yield experience shown in the following tables. For further detail, please see page 167 of the Base Prospectus. Historical yield experience of the Bank Portfolio may not be indicative of future performance of the Bank Portfolio or the Securitised Portfolio.

## Delinquency and Loss Experience

The following tables set forth the delinquency and loss experience for each of the periods shown for the Bank Portfolio of credit card accounts. The Bank Portfolio's delinquency and loss experience is comprised of segments which may, when taken individually, have delinquency and loss characteristics different from those of the overall Bank Portfolio of credit card accounts. Because the Securitised Portfolio is only a portion of the Bank Portfolio, actual delinquency and loss experience with respect to the Receivables comprised therein may be different from that set forth below for the Bank Portfolio. There can be no assurance that the delinquency and loss experience for the Securitised Portfolio in the future will be similar to the historical experience of the Bank Portfolio set forth below. For further detail, please see the Base Prospectus.

## STATIC POOL DATA

The following tables present yield, net charge off, delinquencies, principal payment rate, total payment rate, Principal Receivables balance and total Receivables balance for Receivables included in the Securitised Portfolio since the incorporation of the Penarth Receivables Trust in October 2008. In each case, the information is organised by calendar year of account origination ("Year of Account Origination") for each monthly period.

The data up to October 2010 relates to Receivables originated by Bank of Scotland only. In November 2010, £2.9 billion of Receivables originated by Lloyds Bank were added to the Penarth Receivables Trust, and data from November 2010 reflects the combined Bank of Scotland and Lloyds Bank Receivables in the Penarth Receivables Trust.

Yield from finance charges and fees includes interest income, late fees, forex fees, credit insurance, card protection insurance, overlimit fees, cash advance fees, ATM fees, balance transfer fees and other fees related to credit cards. The yield percentage for each monthly period is calculated by dividing the sum of finance charges, fees and interchange during each monthly period by the Principal Receivables balance at the beginning of the monthly period, then annualised by dividing the result by the number of days in each monthly period and multiplying by the number of days in the calendar year.

Volatility in the yield percentage is driven primarily by variations in the number of collection days during the performance period; the more collection days there are, the higher the value of payments received, and the higher the reported yield.

The yield during the first 24 months post account origination is low due to the introductory annual percentage rate ("APR") offers at account origination which typically offer $0 \%$ on balance transfers and/or purchases during the first 9-24 months. This trend is evident in the yields reported in the first few performance periods for accounts originated in each year from 2009 onwards.

Pre-2004 the operating environment in the UK for credit card issuers was less competitive, and Lloyds Banking Group's acquisition strategy for the Lloyds portfolio had initial APRs at account origination which were typically higher; accordingly, the pre-2004 vintages have a slightly higher yield compared with the post-2004 vintages. The originators believe that the differential margin in yield compared to post-2004 vintages is reducing as Lloyds Banking Group's risk-based re-pricing strategy across the portfolio results in the convergence of yield over time.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from National Westminster Bank plc ("NatWest"). This product rewards credit card spend with Airmiles, and attracts a higher proportion of convenience users who are less likely to revolve a balance on an account and attract interest charges. Yield on the Lloyds originated accounts from 2007 is therefore lower than accounts originated in years prior to 2007.

Following the initial addition of $£ 2.9$ billion of Lloyds Receivables to the Penarth Receivables Trust in November 2010, overall yield for the Penarth Receivables Trust has increased, driven by higher payment
rates and so have the Finance Charge Collections on the Lloyds portfolio relative to the Bank of Scotland portfolio.

Yield on accounts acquired since 2010 is lower than for previous years as a result of an improvement in the quality of new accounts acquired in these years compared to previous years. This is driven by a combination of management actions to improve underwriting, a higher concentration of full payers acquired on the reward products offered by Lloyds, and a general improvement in the macro environment.

Net losses for a performance period is calculated as Principal Receivables charged off during the performance period less recoveries received on previously charged off accounts during the performance period, all divided by the Principal Receivables balance at the beginning of the performance period, then annualised by dividing the result by the number of days in the performance period and multiplying by the number of days in the calendar year.

Net losses during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when $£ 2.9$ billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

The higher charge offs on accounts originated pre-2004 is due to Bank of Scotland originating accounts above-market volumes during 2002 and 2003 in line with Bank of Scotland's market growth strategy at the time. Since 2004, acquisition and underwriting strategies have been reviewed and substantially revised. In accordance with this revised strategy, Lloyds Banking Group has taken significant steps to reduce its acquisition of accounts, and exposure to existing accounts, in the higher risk segments of the credit cards market.

In 2008 during the economic market dislocation, there was an industry-wide deterioration in the quality of business acquired. Lloyds Banking Group undertook significant derisking in response, with tighter cutoffs reducing volume and lower initial credit lines. This activity was undertaken in the second half of 2008 and into 2009 . The originators believe that this has resulted in a significant improvement in the credit quality of accounts originated in since 2009.

Net charge offs in August 2013, January 2014, May 2014, July 2014 and August 2014 are negative for some vintages and below trend for others. This is due to the sale of previously charged off accounts to a third party whereby the proceeds from the sale were recorded as recoveries in the month.

Delinquencies include both Principal Receivables and Finance Charge Receivables. The 30+ days delinquency percentage for a performance period is calculated as total receivables 30 days or more past due divided by total Principal Receivables and Finance Charge Receivables on the last day of the performance period.

Delinquencies during 2008 and the first few months of 2009 are lower due to the initial selection criteria for new Receivables added to the Penarth Receivables Trust which excluded accounts in the later stages of delinquency. This seasoning impact is evident in November 2010 when $£ 2.9$ billion of Lloyds Receivables were added to the Penarth Receivables Trust resulting in reduced net losses; the originators expect net losses to continue to improve in the short term as risk selection criteria remains robust.

In 2008 in response to the deteriorating economic environment, Lloyds Banking Group undertook significant de-risking of its portfolio, with credit lines of higher risk customers reduced and tighter cutoffs and lower initial credit lines improving the quality of new account acquisitions. This activity was undertaken in 2008 and into 2009 . The originators believe that this has resulted in a reduction in delinquencies through the second half of 2009 which continued through 2010 and into 2011.

In 2012 Lloyds Banking Group changed its charge off policy for accounts in financial difficulty where the account holder does not meet the criteria to enter a temporary reduced repayment plan. The charge off of these accounts has been accelerated to 120 days in arrears from the standard 180 days charge off policy. This has resulted in a drop in the level of delinquencies at 120 to 180 days and thus total 30+ days delinquencies.

In 2013 and 2014 delinquencies continued to improve. This was driven by a combination of the established accelerated charge off policy and robust selection criteria.

Principal payment rate for a performance period is calculated as Principal Collections received from cardholders during the performance period divided by Principal Receivables at the beginning of the performance period.

For the Bank of Scotland portfolio, pre-2004 account originations typically received higher spending rewards and attracted a higher percentage of convenience users. As a result, payment rates for this segment tend to be stronger for the pre-2004 vintage. From 2005 onwards, Bank of Scotland products have typically targeted the borrower population with more attractive lower introductory APRs instead of rewards. This strategy has reduced the average payment rate on Bank of Scotland's credit card receivables originated since 2005.

In July 2007, Lloyds launched the Airmiles Duo card, taking over the Airmiles relationship from NatWest. This product rewards credit card spend with Airmiles, and attracts a higher proportion of convenience users who pay down their balance in full each month. Payment rates for this product on the Lloyds portfolio increased not only for originations from 2007, but also for the pre-2007 vintages as some existing customers switched to the new product and changed their spending and payment behaviours to benefit from the Airmiles rewards. Payment rates have increased across all origination years from November 2010 following the initial addition of $£ 2.9$ billion of Lloyds Receivables to the Penarth Receivables Trust and have continued to increase as the quality of the portfolio has improved (including throughout 2014).
