Cashflows

Revenue receipts and principal receipts are allocated in accordance with 'The Mortgages Trust' and 'Cashflows' sections of the Base Prospectus. Briefly, on a monthly basis Mortgages Trust Revenue Receipts are allocated on a pro-rata basis between Funding 1, Funding 2 and the Seller based upon their respective shares in the Trust and Mortgages Trust Principal Receipts are allocated first on a pro-rata basis between Funding 1 and Funding 2 based upon their respective shares in the Trust and their outstanding cash accumulation requirements, until their requirements have been satisfied, and then to the Seller. On a quarterly basis, Funding 1 will distribute its receipts to the previous Funding 1 issuers, Funding 2 will distribute its receipts to the Master Issuer and in turn the issuing entities will distribute their respective receipts to the noteholders, via the paying agents and issuing entity swap providers.

Glossary

Seasoning

Capitalised arrears	Arrears of interest may be capitalised with the agreement of the borrower once a borrower has made six consecutive scheduled

payments of at least the contractual amount.

Constant Prepayment Rate The Constant Prepayment Rate (CPR) is an annualised percentage reflecting the amount of principal prepaid in excess of

scheduled principal receipts. CPR is currently unavailable.

Current LTV Current LTV is calculated using the latest Indexed Valuation held in the Seller's records.

Indexed Valuation Indexation is applied quarterly in January, April, July and October to property valuations using the Halifax House Price Index.

Defaulted Loan A loan is defined as being in default when the property relating to that loan has been taken into possession.

Excess Spread Excess Spread (%) is calculated by dividing the annual equivalent of the remaining Available Revenue Receipts after crediting

the General Reserve Fund into the weighted average principal amount outstanding of the notes during the Interest Period.

Months in arrears The number of months in arrears based on the most recent payments due. It is not the amount of arrears divided by the current

payment due. The arrears table on page 1 includes repossessions.

Mortgage Account A mortgage account consists of one or more loans secured, by way of equal ranking first charge, on the same property and

thereby forming a single mortgage account.

becomes payable on pass-through notes.

Original LTV LTV at origination has been calculated using the valuation at origination of the initial loan in a mortgage account, where this is still

held in the Seller's records. Where this original valuation is no longer held, the latest valuation has been used in the calculation.

Any fees added to the initial loan at origination have been excluded from the calculation.

Outstanding principal balance The aggregate principal balance of the loans including (without double counting) the initial advance, any further advance, any

flexible loan drawing, capitalised expenses, capitalised arrears and capitalised interest less any prepayments, repayments or

payments of the foregoing prior to the relevant date, plus accrued interest on the loans as at the relevant date.

Principal Payment Rate Monthly PPR reflects the aggregate of scheduled and unscheduled principal receipts, including the proceeds from any loan

repurchases by the Seller. It should be noted that in previous reports, this was labelled CPR.

Region Reported regions are NUTS1 classifications. NUTS is Nomenclature of Units for Territorial Statistics.

Scheduled Maturity Date

The date or dates when principal is scheduled to be repaid on bullet and scheduled amortisation notes and from when principal

Seasoning is reported on an aggregated basis for each mortgage account. It is calculated using the origination date of the

original loan in the mortgage account and ignores any subsequent loans in the mortgage account.

Type of Loan The 'Type of loan' and 'Distribution of fixed rate loans' tables have been prepared on the basis of the type of loan applicable to

each mortgage accounts primary product holding. In addition to the primary product holding, a mortgage account may have other

active product holdings which may or may not be the same type as the primary product holding.
