## OTHER INFORMATION

### Interests of natural and legal persons involved in the issue:

Save as discussed in these Final Terms, so far as the issuing entity is aware, no person involved in the offer of the Notes has an interest material to the offer.

### INFORMATION RELATING TO OTHER NOTES ISSUED BY THE MASTER ISSUER AS AT THE CLOSING DATE AND CORRESPONDING LOAN TRANCHES ADVANCED TO FUNDING 2

As of the Closing Date, the aggregate principal amount outstanding of all notes issued by the issuing entity (converted, where applicable, into sterling at the applicable specified currency exchange rate), including the issue of the 2015-1 notes described herein, will be as follows:

£9,258,581,512.16

As of the Closing Date, the aggregate outstanding principal balance of rated loan tranches advanced by the issuing entity to Funding 2 under the master intercompany loan agreement, including the rated loan tranches described herein, will be as follows:

£9,258,581,512.16

### INFORMATION RELATING TO NOTES ISSUED BY FUNDING 1 ISSUING ENTITIES AS AT THE CLOSING DATE AND CORRESPONDING TERM ADVANCES MADE TO FUNDING 1 ISSUING ENTITIES

As of the Closing Date, the aggregate principal amount outstanding of notes previously issued by the Funding 1 issuing entities (converted, where applicable, into sterling at the applicable currency exchange rate), will be as follows:

£0

As of the Closing Date, the aggregate outstanding balance of the term advances previously made by the Funding 1 issuing entities to Funding 1 will be as follows:

£0

### INFORMATION RELATING TO FUNDING 2 START-UP LOANS

The following start-up loans were previously made available to Funding 2 by Halifax (then in its capacity as the Funding 2 start-up loan provider) or Bank of Scotland as the Funding 2 start-up loan provider in connection with the issues of notes set out below. Halifax's rights under the start-up loans made available by it were transferred to Bank of Scotland on 17 September 2007 pursuant to the HBOS Group Reorganisation Act 2006.

<b>Issue</b>	<b>Current outstanding principal balance</b>	<b>Interest rate</b>

## INFORMATION RELATING TO FUNDING 2 Z LOANS

The following Funding 2 Z loans were previously made available to Funding 2 by Bank of Scotland as the Funding 2 Z loan provider. No Funding 2 Z loan will be advanced to Funding 2 on the closing date.

<b>Current outstanding principal balance<sup>4</sup></b>	<b>Interest rate</b>
£2,548,000,000	Three-month sterling LIBOR plus 0.90% per annum

## INFORMATION RELATING TO FUNDING 1 START-UP LOANS

All previous start-up loans made available to Funding 1 have been repaid and no start-up loan will be advanced to Funding 1 on the closing date.

## INFORMATION RELATING TO FUNDING 1 Z LOANS

All previous Funding 1 Z loans made available to Funding 1 have been repaid and no Funding 1 Z loan will be advanced to Funding 1 on the closing date.

## INFORMATION RELATING TO ISSUING ENTITY START-UP LOANS

No issuing entity start-up loan has been advanced to the issuing entity as at the date hereof and no issuing entity start-up loan will be advanced to the issuing entity on the closing date.

## INFORMATION RELATING TO ISSUING ENTITY SUBORDINATED LOANS

No issuing entity subordinated loan has been advanced to the issuing entity as at the date hereof and no issuing entity subordinated loan will be advanced to the issuing entity on the closing date.

## INFORMATION RELATING TO THE MORTGAGES TRUST AND THE PORTFOLIO

Material information with respect to the loans expected to be in the mortgages trust at the Closing Date is set out in "**Statistical information on the portfolio**" below.

In addition:

- the minimum seller share will be approximately £350,000,000;
- the Funding 1 share will be approximately £0, representing approximately 0 per cent. of the trust property;
- the Funding 2 share will be approximately £10,358,000,000, representing approximately 61.8 per cent. of the trust property; and
- the seller share will be approximately £6,392,000,000, representing approximately 38.2 per cent. of the trust property.

The actual amounts of the Funding 1 share, the Funding 2 share and the seller share of the trust property as at the Closing Date will not be determined until the Closing Date, which will be after the date of these Final Terms.

For the purposes of paragraph (d) of the definition of **non-asset trigger event**, the aggregate outstanding balance of loans comprising the trust property need not be more than £0 (the **minimum trust size**). See "**The mortgages trust – Cash management of trust property – distribution of principal receipts to Funding 2**" in the base prospectus.

<sup>4</sup> After taking into account any repayment of Funding 2 Z loans on the Closing Date.

## **INFORMATION RELATING TO THE MORTGAGE SALE AGREEMENT AND THE PORTFOLIO AS AT THE CLOSING DATE**

For the purposes of clause 4.2 of the mortgage sale agreement, the Minimum Trust Property Yield Margin means 1.5%.

For the purposes of paragraph (c) of the definition of **product switch** (See “**Sale of the loans and their related security – Product switches**” in the base prospectus) any variation to the maturity date of a loan must not extend beyond 30 June 2040 while any rated loan tranche under the master intercompany loan is outstanding.

For the purposes of the representations and warranties of the seller under the mortgage sale agreement:

- (a) each loan in the portfolio was made no earlier than 1 February 1996 and no later than 31 July 2015;  
and
- (b) the final maturity date of each loan in the portfolio is no later than 30 June 2040.

### Fitch Portfolio Test Values

For the purposes of the Fitch portfolio tests (see “**Sale of the loans and their related security – Sale of loans and their related security to the mortgages trustee on the sale dates**” in the base prospectus):

- (a) the margin by which the original weighted average LTV ratio may exceed that at the Closing Date shall be 2 per cent.<sup>5</sup>;
- (b) item (b) of the Fitch portfolio test values is not applicable<sup>6</sup>;
- (c) the margin by which the current weighted average LTV ratio may exceed that at the Closing Date shall be 2 per cent.<sup>7</sup>;
- (d) the margin by which the weighted average debt to income multiple may exceed that at the Closing Date shall be 0.35<sup>8</sup>; and
- (e) the percentage limit that the outstanding principal balance of any loans in the portfolio with an interest only part represents of the outstanding principal balance of the loans in the portfolio shall be 50 per cent.

---

<sup>5</sup> As set out in the base prospectus, this figure may be further adjusted in subsequent final terms or drawdown prospectus.

<sup>6</sup> As set out in the base prospectus, this figure may be further adjusted in subsequent final terms or drawdown prospectus.

<sup>7</sup> As set out in the base prospectus, this figure may be further adjusted in subsequent final terms or drawdown prospectus.

<sup>8</sup> As set out in the base prospectus, this figure may be further adjusted in subsequent final terms or drawdown prospectus.

### **Use of proceeds**

The gross proceeds from the issue of the 2015-1 notes equal approximately £2,889,837,512.16 and (after exchanging, where applicable, the proceeds of the 2015-1 notes for sterling, calculated by reference to the applicable specified currency exchange rate) will be used by the issuing entity to make available rated loan tranches to Funding 2 pursuant to the terms of the master intercompany loan agreement. Funding 2 will use the gross proceeds of each rated loan tranche to pay the purchase price to the seller for the sale of part of its share in the trust property to Funding 2 on the Closing Date.

## Maturity and prepayment considerations

The average lives of any series and class of the 2015-1 notes cannot be stated, as the actual rate of repayment of the loans and redemption of the mortgages and a number of other relevant factors are unknown. However, calculations of the possible average lives of each series and class of the 2015-1 notes can be made based on certain assumptions. The assumptions used to calculate the possible average lives of each series and class of the 2015-1 notes in the following table include that:

- (1) neither the issuing entity security nor the Funding 2 security has been enforced;
- (2) the seller is not in breach of the terms of the mortgage sale agreement;
- (3) the seller sells no new loans to the mortgages trustee after the Closing Date (except to the extent required to maintain the minimum seller share) and the loans are assumed to amortise in accordance with the assumed constant payment rate indicated in the table below;
- (4) neither an asset trigger event nor a non-asset trigger event occurs;
- (5) no event occurs that would cause payments on scheduled amortisation loan tranches or pass-through loan tranches to be deferred (unless such advances are deferred in accordance with Rule (1)(B) or Rule (1)(C) as set out in “Cashflows – Distribution of Funding 2 available principal receipts – Rule (1) – Repayment deferrals” in the base prospectus);
- (6) the annualised CPR as at the Closing Date is assumed to be the same as the various assumed rates in the table below;
- (7) there is a balance of £1,279,000,000 in the Funding 2 cash accumulation ledger at the Closing Date and a balance of £0 in the Funding 1 cash accumulation ledger at the Closing Date;
- (8) the issuing entity exercises its option to redeem all notes on the Step-Up Date relating to such notes;
- (9) the long-term, unsecured, unsubordinated and unguaranteed debt obligations of the seller continue to be rated at least “A3” by Moody’s and “A-” by Standard & Poor’s, the long-term “Issuer Default Rating” of the seller continues to be at least “A” by Fitch and the short-term “Issuer Default Rating” of the seller continues to be at least “F1” by Fitch;
- (10) no interest or fees are paid from principal receipts;
- (11) the mortgage loans are not subject to any defaults or losses, and no mortgage loan falls into arrears; and
- (12) the Closing Date is 20 October 2015.

### CPR and possible average lives of each series and class of issue 2015-1 notes (in years)

Based upon the foregoing assumptions, the approximate average life in years of each series and class of issue 2015-1 notes, at various assumed rates of repayment of the loans, would be as at the Closing Date as follows:

Constant payment rate <sup>(1)</sup> (per annum)	Series 1 Class A1	Series 1 Class A2	Series 1 Class A3	Series 1 Class A4	Series 1 Class B	Series 1 Class M	Series 1 Class C
5 per cent.....	1.89	2.86	4.94	9.99	9.99	9.99	6.99
10 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99
15 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99
20 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99
25 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99

30 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99
35 per cent.....	1.89	2.86	4.93	9.99	9.99	9.99	6.99

(1) Includes both scheduled and unscheduled payments.

Assumptions (1), (2), (3), (4), (5), (6), (8), (9), (10) and (11) relate to circumstances which are not predictable. No assurance can be given that the issuing entity will be in a position to redeem the 2015-1 notes on the Step-Up Date. If the issuing entity does not so exercise its option to redeem, then the average lives of the then outstanding 2015-1 notes would be extended.

The average lives of the 2015-1 notes are subject to factors largely outside the control of the issuing entity and consequently no assurance can be given that these assumptions and estimates will prove in any way to be realistic and they must therefore be viewed with considerable caution. For more information in relation to the risks involved in the use of these estimated average lives, see **“Risk factors – The yield to maturity of your notes may be adversely affected by prepayments or redemptions on the loans”** in the base prospectus.

## Statistical information on the portfolio

### The cut-off date mortgage portfolio

For the purposes of this section entitled “**Statistical information on the portfolio**”, all references to “portfolio”, unless the context otherwise requires, include the loans and their related security currently comprising the mortgages trust. For the avoidance of doubt, no further loans and their related security will be sold to the mortgages trustee on the closing date.

The statistical and other information contained in these Final Terms has been compiled by reference to the loans in the portfolio as at the cut-off date that, subject as provided, are expected to indirectly secure the 2015-1 notes and all other notes of the issuing entity as at 31 July 2015 (the **cut-off date**). Columns stating percentage amounts may not add up to 100% due to rounding. The loans in the mortgages trust are selected on the basis of the seller's selection criteria for inclusion in the mortgages trust. The material aspects of the seller's lending criteria are described under “**The loans – Underwriting –**” and “**The loans – Lending criteria**” in the base prospectus. Standardised credit scoring is not used in the UK mortgage market. For an indication of the credit quality of borrowers in respect of the loans, investors may refer to such lending criteria and to the historical performance of the loans in the mortgages trust as set forth in these Final Terms. One significant indicator of obligor credit quality is arrears and losses. The information presented under “**Delinquency and loss experience of the portfolio (including loans which and only whilst they previously formed part of the portfolio)**” on page 29 in these Final Terms reflects the arrears and repossession experience for loans in the portfolio as at the cut-off date, including loans that were contained in the portfolio since the inception of the mortgages trust. All of the loans in the table were originated by Halifax or by Bank of Scotland under the “Halifax” brand (the **Halifax loans**), but not all of the loans form part of the portfolio. It is not expected that the characteristics of the portfolio as at the Closing Date will differ materially from the characteristics of the portfolio as at the cut-off date. Except as otherwise indicated, these tables have been prepared using the current balance as at the cut-off date, which includes all principal and accrued interest for the loans in the portfolio.

The portfolio as at the cut-off date consisted of 242,802 mortgage accounts, comprising loans originated by Halifax or by Bank of Scotland under the “Halifax” brand and secured over properties located in England, Wales and Scotland and having an aggregate outstanding principal balance of £17,497,355,011.39 as at that date. The loans in the portfolio as at the cut-off date were originated between 1 February 1996 and 31 October 2010.

As at 31 July 2015, HVR 1 was 3.99% per annum, HVR 2 was 3.89% per annum, HHVR was 3.99% per annum and the Halifax flexible variable rate was 3.89% per annum.

Approximately 1.96% of the aggregate outstanding principal balance of the loans in the portfolio as at the cut-off date were extended to the relevant borrowers in connection with the purchase by those borrowers of properties from local authorities or certain other landlords under the **right-to-buy** schemes governed by the Housing Act 1985 (as amended) or (as applicable) the Housing (Scotland) Act 1987 (as amended).

\* Including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees.

The largest mortgage account (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) had an outstanding current balance as at the cut-off date of £499,045.66 and the smallest mortgage account had an outstanding current balance as at the cut-off date of -£32,224.81. The weighted average current balance (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the cut-off date was approximately £133,880.78.

### LTV ratios at origination

The following table shows the range of LTV ratios, which express the outstanding balance of the aggregate of loans in a mortgage account (excluding capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the date of the initial loan origination divided by the value of the property securing the loans in that mortgage account at the same date. The seller has not revalued any of the mortgaged properties since the date of the origination of the related loan other than where an additional lending or certain product transfer has been applied for or granted on an account since origination, in which case the original valuation may have been updated with a more recent valuation. Where this is the case, this revised valuation has been used in formulating this data.

The weighted average LTV ratio of the mortgage accounts (excluding any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) at origination was 73.07%. The highest LTV ratio of any mortgage account (excluding any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) at origination was 97.00% and the lowest was 0.17%.

## Cut-off date LTV ratios

The following table shows the range of LTV ratios, which express the outstanding balance of the aggregate of loans in a mortgage account (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the cut-off date divided by the indexed valuation of the property securing the loans in that mortgage account at the same date.

The weighted average LTV ratio of the mortgage accounts (including any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the cut-off date was 49.10%. The highest LTV ratio of any mortgage account (including any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) was 160.69% and the lowest was -21.79%.

## Geographical distribution

The following table shows the distribution of properties securing the loans throughout England, Wales and Scotland as at the cut-off date. No such properties are situated outside England, Wales or Scotland'. The seller's lending criteria and current credit scoring tests do not take into account the geographical location of the property securing a loan.

## Payment rate analysis

The following table shows the annualised payment rate for the most recent one-month, three-month and 12-month period for the mortgage accounts in the portfolio.

As of month-end	one-month annualised	three-month annualised	12-month annualised
July 2015	23.38%	18.00%	18.03%

In the table above,

- one-month annualised CPR is calculated as  $1 - ((1 - R) ^ 12)$ ,
- three-month annualised CPR is calculated as the average of the one-month annualised CPR for the most recent three months, and
- 12-month annualised CPR is calculated as the average of the one-month annualised CPR for the most recent 12 months,

where in each case R is (i) total principal receipts received plus the principal balance of loans repurchased by the seller (primarily due to further advances) during the relevant period, divided by (ii) the aggregate outstanding principal balance of the loans in the portfolio as at the start of that period.

## Delinquency and loss experience of the portfolio (including loans which and only whilst they previously formed part of the portfolio)

Since the establishment of the mortgages trust, total cumulative losses on loans whilst the loan formed part of the portfolio were £144,461,589.00 as at 31 July 2015.

The following table summarises loans in arrears and repossession experience for loans in the portfolio (including loans which and only whilst they previously formed part of the portfolio) as at the cut-off date. The seller will represent and warrant on the Closing Date that no loan to be transferred to the mortgages trust on the Closing Date will have experienced any arrears in the prior 12 months. All of the loans in the table were originated by Halifax or by Bank of Scotland under the "Halifax" brand. Bank of Scotland services all of the Halifax loans.

Bank of Scotland identifies a loan as being in arrears where an amount equal to or greater than ' full month's contractual payment is past its due date. Bank of Scotland does not define a loan as defaulted at any particular delinquency level, but rather at the time it takes the related property into possession. Bank of Scotland does not write off a loan as uncollectible until it disposes of the property relating to that loan following default.

There can be no assurance that the arrears experience with respect to the loans comprising the portfolio in the future will correspond to the experience of the portfolio as set forth in the foregoing table. If the property market experiences a further decline in property values so that the value of the properties in the portfolio falls or (in the case of properties which are currently below the principal balance of the relevant loan) remains, below the principal balances of the loans, the actual rates of arrears and losses could be significantly higher than those previously experienced, as borrowers may no longer be able to refinance their loans or sell their properties and move to more affordable properties. In addition, other adverse economic conditions, whether or not they affect property values, may nonetheless affect the timely payment by borrowers of principal and interest and, accordingly, the rates of arrears and losses with respect to the loans in the portfolio. Noteholders should observe that the United Kingdom experienced relatively low and stable interest rates during the periods covered in the preceding table. If interest rates were to rise, it is likely that the rate of arrears would rise.

In the late 1980s house prices rose substantially faster than inflation as housing turnover increased to record levels. This was at a time when the economy grew rapidly, which led to falling unemployment and relatively high rates of real income growth. These fed into higher demand for housing, and house prices rose rapidly. Demand was further increased by changes in taxation legislation with regard to tax relief on mortgage payments in 1988. When monetary policy was subsequently tightened (in terms of both “locking in” sterling to the European Exchange Rate Mechanism and higher interest rates), the pace of economic activity first slowed and then turned into recession. Rising unemployment combined with high interest rates led to a fall in housing demand and increased default rates and repossessions. The ability of borrowers to refinance was limited as house prices began to fall and many were in a position of negative equity (borrowings greater than the resale value of the property) in relation to their mortgages.

The level of mortgage arrears on the Halifax loans reduced following the recession in the United Kingdom in the early nineties. The introduction of the scorecard in judging applications – and thus reducing discretion helped to keep the arrears level low, as did a healthy economic climate and low interest rates.

House price inflation has indirectly contributed to the improved arrears situation by enabling borrowers to sell at a profit if they encounter financial hardship.

The dislocation of financial markets in 2007 led to supply issues in the housing finance market while falling house prices and consumer confidence reduced demand for property. This has resulted in some borrowers being unable to sell their property or to refinance their loans due to either a lack of equity, in some instances negative equity, or the lack of available housing finance.

Whilst the economy slowed during 2008 and was in recession for the majority of 2009, during which time unemployment rose, interest rates fell to historically low levels, easing mortgage affordability. This

easing of mortgage affordability combined with the use of the scorecard, referred to above, has meant that arrears levels did not rise at this time to the levels experienced in the early nineties. As the economic environment has improved in recent years, the level of arrears has also reduced. In January and July 2015, the Seller exercised its option to repurchase accounts three months or more in arrears (January 2015: loans with an aggregate outstanding balance of £534,420,347.92; July 2015: 1,292 loans with an aggregate outstanding balance of £128,281,423.69) from the portfolio and the value of loans in arrears fell accordingly.

Bank of Scotland regularly reviews its lending policies in the light of prevailing market conditions and reviews actions so as to mitigate possible problems. The performance of new business and the arrears profiles are continuously monitored in monthly reports. Any deterioration of the arrears level is investigated and the internal procedures are reviewed if necessary.

## Characteristics of the United Kingdom residential mortgage market

The United Kingdom housing market is primarily one of owner-occupied housing, with the remainder in some form of public, private landlord or social ownership. The mortgage market, whereby loans are provided for the purchase of a property and secured on that property, is the primary source of household borrowings in the United Kingdom.

Set out in the following tables are certain characteristics of the United Kingdom mortgage market.

### Industry PPR rates

In the following tables, quarterly industry principal payment rate (**industry PPR**) data was calculated by dividing the amount of scheduled and unscheduled repayments of mortgages made by banks and building societies in a quarter by the quarterly balance of mortgages outstanding for banks and building societies in the United Kingdom. These quarterly repayment rates were then annualised using standard methodology.

### House price index

United Kingdom residential property prices, as measured by the Nationwide House Price Index and the Halifax House Price Index (collectively the **Housing Indices**), have generally outperformed the United Kingdom Retail Price Index over the past 25 years. (Nationwide is a United Kingdom building society and Halifax is a brand name of Bank of Scotland, a United Kingdom bank. Markit agreed in March 2015 to acquire the Halifax House Price Index from Lloyds Banking Group.)

The United Kingdom housing market has been through various economic cycles in this period, with large year-to-year increases in the Housing Indices occurring in the late 1980s and the mid 1990s through to mid 2007 and decreases occurring in the early 1990s and mid 2007 through late 2009. Prices remained broadly stable until 2013 and have increased again over recent quarters.

The percentage change in the table above is calculated in accordance with the following formula:

$$(X-Y)/Y$$

where X is equal to the current year's index value and Y is equal to the index value of the previous year.

The figures for the Nationwide House Price Index are the average of the published monthly indices for that year.

## Static Pool Data

This section sets out, to the extent material, certain static pool information with respect to the loans in the mortgages trust.

The issuing entity has not included static pool information in this section in respect of prepayments, as this information is not separately identified by the servicer. However, prepayment rates in respect of the mortgage loans in the mortgages trust are set out in the monthly reports to investors that are prepared pursuant to the servicing agreement. To date, prepayment rates in respect of the mortgage loans in the mortgages trust have broadly been in line with the industry PPR data set out on page 32 above.

One of the characteristics of the mortgages trust is that the seller is able to sell more loans to the mortgages trustee over time, whether in connection with an issuance of notes by the issuing entity, any new Funding 2 issuing entity or any Funding 1 issuing entity or in order to maintain the minimum seller share. To aid in understanding changes to the mortgages trust over time, the following table sets out information relating to each sale of loans by the seller to the mortgages trustee pursuant to the mortgage sale agreement.

The sale of new loans by the seller to the mortgages trustee is subject to conditions, including ones required by the rating agencies, designed to maintain certain credit-related and other characteristics of the mortgages trust. These include limits on loans in arrears in the mortgages trust at the time of sale, limits on the aggregate balance of loans sold, limits on changes in the weighted average foreclosure frequency (**WAFF**) and the weighted average loss severity (**WALS**), minimum yield for the loans in the mortgages trust after the sale, the Fitch portfolio tests and maximum LTV for the loans in the mortgages trust after the sale. See a description of these conditions in “**Sale of the loans and their related security — Sale of loans and their related security to the mortgages trustee on the sale dates**” in the base prospectus.

The following tables show, for each of the latest five years of origination, the distribution of loans in the mortgages trust originated in that year by delinquency category as at each year-end starting in 2010.
