Prohibition of sales to EEA investors - The Notes are not intended to be offered, sold or otherwise made available to and, should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (EEA). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (**MiFID II**); or (ii) a customer within the meaning of Directive (EU) 2016/97, as amended and/or superseded (**IMD**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently no key information document required by Regulation (EU) No 1286/2014 (the **PRIIPs Regulation**) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

MiFID II product governance / target market - Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

Verification of data

The seller has caused a representative sample of the relevant loans (including the data disclosed in respect of those loans) to be the subject of external verification by an appropriate and independent third party. The seller has reviewed the reports of such independent third parties and is of the opinion that there were no significant adverse findings in such reports.

For the purposes of the Fitch portfolio tests (see “**Sale of the loans and their related security – Sale of loans and their related security to the mortgages trustee on the sale dates**” in the Base Prospectus):

- (b) item (b) of the Fitch portfolio test values is not applicable;
- (c) the margin by which the current weighted average LTV ratio may exceed that at the Closing Date shall be 2.00 per cent.;
- (d) the margin by which the weighted average debt to income multiple may exceed that at the Closing Date shall be 0.35; and

USE OF PROCEEDS

The gross proceeds from the issue of the 2019-1 notes equal approximately £1,953,950,000 and (after exchanging, where applicable, the proceeds of the 2019-1 class A1 notes for sterling, calculated by reference to the applicable specified currency exchange rate) will be used by the issuing entity to make available rated loan tranches to Funding 2 pursuant to the terms of the master intercompany loan agreement. Funding 2 will use the gross proceeds of each rated loan tranche to pay the purchase price to the seller for the sale of part of its share in the trust property to Funding 2 on the Closing Date.

MATURITY AND PREPAYMENT CONSIDERATIONS

The average lives of any series and class of the 2019-1 notes cannot be stated, as the actual rate of repayment of the loans and redemption of the mortgages and a number of other relevant factors are unknown. However, calculations of the possible average lives of each series and class of the 2019-1 notes can be made based on certain assumptions. The assumptions used to calculate the possible average lives of each series and class of the 2019-1 notes in the following table include that:

- (1) neither the issuing entity security nor the Funding 2 security has been enforced;
- (2) the seller is not in breach of the terms of the mortgage sale agreement;
- (3) the seller sells no new loans to the mortgages trustee after the Closing Date (except to the extent required to maintain the minimum seller share) and the loans are assumed to amortise in accordance with the assumed constant payment rate indicated in the table below;
- (4) neither an asset trigger event nor a non-asset trigger event occurs;
- (5) no event occurs that would cause payments on scheduled amortisation loan tranches or pass-through loan tranches to be deferred (unless such advances are deferred in accordance with Rule (1)(B) or Rule (1)(C) as set out in “Cashflows – Distribution of Funding 2 available principal receipts - Rule (1) – Repayment deferrals” in the Base Prospectus);
- (6) the annualised CPR as at the Closing Date is assumed to be the same as the various assumed rates in the table below;
- (7) there is a balance of £0 in the Funding 2 cash accumulation ledger at the Closing Date and a balance of £0 in the Funding 1 cash accumulation ledger at the Closing Date;
- (8) the issuing entity exercises its option to redeem all the notes on the Step-Up Date relating to such notes;
- (9) the long-term, unsecured, unsubordinated and unguaranteed debt obligations of the seller continue to be rated at least “Aa3” by Moody's and “A+” by Standard & Poor's, the long-term “Issuer Default Rating” of the seller continues to be at least “A+” by Fitch and the short-term “Issuer Default Rating” of the seller continues to be at least “F1” by Fitch;
- (10) no interest or fees are paid from principal receipts;
- (11) the mortgage loans are not subject to any defaults or losses, and no mortgage loan falls into arrears;
- (12) all interest payment dates occur on the 15th of each calendar month (adjusted for weekends) and a day count fraction of Act/365 is utilised; and
- (13) the Closing Date is 10 October 2019.

CPR and possible average lives of each series and class of issue 2019-1 notes (in years)

Based upon the foregoing assumptions, the approximate average life in years of each series and class of issue 2019-1 notes, at various assumed rates of repayment of the loans, would be as follows:

Constant payment rate ⁽¹⁾ (per annum)	Series 1 class A1 Notes	Series 1 class A2 Notes	Series 1 class A3 Notes	Series 1 class A4 Notes
5 per cent	2.02	2.90	4.99	5.02
10 per cent	1.95	2.89	4.99	5.02
15 per cent	1.95	2.89	4.99	5.02
20 per cent	1.95	2.89	4.99	5.02

Constant payment rate⁽¹⁾ (per annum)	Series 1 class A1 Notes	Series 1 class A2 Notes	Series 1 class A3 Notes	Series 1 class A4 Notes
25 per cent	1.95	2.89	4.99	5.02
30 per cent	1.95	2.89	4.99	5.02
35 per cent	1.95	2.89	4.99	5.02

(1) Includes both scheduled and unscheduled payments.

Assumptions (1), (2), (3), (4), (5), (8), (9), (10) and (11) relate to circumstances which are not predictable. No assurance can be given that the issuing entity will be in a position to redeem the 2019-1 notes on the Step-Up Date. If the issuing entity does not so exercise its option to redeem, then the average lives of the then outstanding 2019-1 notes would be extended.

The average lives of the 2019-1 notes are subject to factors largely outside the control of the issuing entity and consequently no assurance can be given that these assumptions and estimates will prove in any way to be realistic and they must therefore be viewed with considerable caution. For more information in relation to the risks involved in the use of these estimated average lives, see “**Risk factors – The yield to maturity of your notes may be adversely affected by prepayments or redemptions on the loans**” in the Base Prospectus.

STATISTICAL INFORMATION ON THE PORTFOLIO

The cut-off date mortgage portfolio

For the purposes of this section entitled “**Statistical information on the portfolio**”, all references to “portfolio”, unless the context otherwise requires, include the loans and their related security currently comprising the mortgages trust and the new loans and their related security expected to be sold to the mortgages trustee on the closing date.

The statistical and other information contained in this Drawdown Prospectus has been compiled by reference to the loans in the portfolio as at the cut-off date that, subject as provided, are expected to indirectly secure the 2019-1 notes and all other notes of the issuing entity as at 31 July 2019 (the **cut-off date**). Columns stating percentage amounts may not add up to 100% due to rounding. A loan will be removed from any new pool of loans to be sold to the Mortgages Trustee on the Closing Date (which comprises a portion of the portfolio as at the cut-off date) if, in the period from the cut-off date up to (and including) the assignment date relating to such new pool of loans, the loan is repaid in full or if the loan does not comply with the terms of the mortgage sale agreement on or about the applicable assignment date. The loans in the mortgages trust are selected on the basis of the seller's selection criteria for inclusion in the mortgages trust. The material aspects of the seller's lending criteria are described under “**The loans – Underwriting –**” and “**The loans – Lending criteria**” in the base prospectus. Standardised credit scoring is not used in the UK mortgage market. For an indication of the credit quality of borrowers in respect of the loans, investors may refer to such lending criteria and to the historical performance of the loans as set forth in this Drawdown Prospectus. One significant indicator of obligor credit quality is arrears and losses. The information presented in the table “**Delinquency and loss experience on loans originated by Halifax or by Bank of Scotland under the "Halifax" brand (including loans in the portfolio)**” on page 40 in this Drawdown Prospectus reflects the arrears and repossession experience for loans in the expected portfolio as at the cut-off date, including loans that were contained in the portfolio since the inception of the mortgages trust. All of the loans in the table were originated by Halifax or by Bank of Scotland under the “Halifax” brand (the **Halifax loans**), but not all of the loans form part of the portfolio. It is not expected that the characteristics of the portfolio as at the Closing Date will differ materially from the characteristics of the portfolio as at the cut-off date. Except as otherwise indicated, these tables have been prepared using the current balance as at the cut-off date, which includes all principal and accrued interest for the loans in the portfolio.

The expected portfolio as at the cut-off date consisted of 151,584 mortgage accounts, comprising loans originated by Halifax or by Bank of Scotland under the “Halifax” brand and secured over properties located in England, Wales and Scotland and having an aggregate outstanding principal balance of £12,775,307,331.92 as at that date. The loans in the expected portfolio as at the cut-off date were originated between February 1996 and April 2019.

As at 31 July 2019, HVR 1 was 4.24% per annum, HVR 2 was 4.14% per annum, HHVR was 4.24% per annum and the Halifax flexible variable rate was 4.14% per annum.

Approximately 1.74% of the aggregate outstanding principal balance of the loans in the portfolio as at the cut-off date were extended to the relevant borrowers in connection with the purchase by those borrowers of properties from local authorities or certain other landlords under the **right-to-buy** schemes governed by the Housing Act 1985 (as amended) or (as applicable) the Housing (Scotland) Act 1987 (as amended).

* Including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees.

The largest mortgage account (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) had an outstanding current balance as at the cut-off date of £545,312.95 and the smallest mortgage account had an outstanding current balance as at the cut-off date of -£56,001.79. The weighted average outstanding current balance (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the cut-off date was £164,293.64. The loan with the balance of £545,312.95 had been subject to a further advance in the period just prior to the cut-off date and, since this then exceeded the level permitted by the seller's representations and warranties, it was subsequently repurchased from the pool on 15th August 2019 as part of the normal monthly processes.

The aggregate outstanding principal balance of all loans to a single borrower does not exceed 2.00% of the aggregate outstanding principal balance of all loans as of the cut-off date.

LTV ratios at origination

The following table shows the range of LTV ratios, which express the outstanding balance of the aggregate of loans in a mortgage account (excluding capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the date of the initial loan origination divided by the value of the property securing the loans in that mortgage account at the same date. The seller has not revalued any of the mortgaged properties since the date of the origination of the related loan other than where an additional lending or certain product transfer has been applied for or granted on an account since origination, in which case the original valuation may have been updated with a more recent valuation. Where this is the case, this revised valuation has been used in formulating this data.

The weighted average LTV ratio of the mortgage accounts (excluding any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) at origination was 72.47%. The highest LTV ratio of any mortgage account (excluding any capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) at origination was 97.00% and the lowest was 1.11%.

The following table shows the range of LTV ratios, which express the outstanding balance of the aggregate of loans in a mortgage account (including capitalised interest, capitalised high LTV fees, insurance fees, booking fees and valuation fees) as at the cut-off date divided by the indexed valuation of the property securing the loans in that mortgage account at the same date.

Payment rate analysis

The following table shows the annualised payment rate for the one-month, three-month and 12-month period for the mortgage accounts in the portfolio, as at July 2019.

As of month-end	one-month annualised	three-month annualised	12-month annualised
1.61%	17.72%	16.91%	19.61%

- one-month annualised CPR is calculated as $1 - ((1 - R) ^ 12)$,

- three-month annualised CPR is calculated as the average of the one-month annualised CPR for the most recent three months, and
- 12-month annualised CPR is calculated as the average of the one-month annualised CPR for the most recent 12 months,

where in each case R is (i) total principal receipts received plus the principal balance of loans repurchased by the seller (primarily due to further advances) during the relevant period, divided by (ii) the aggregate outstanding principal balance of the loans in the portfolio as at the start of that period.

Delinquency and loss experience of the portfolio (including loans which and only whilst they previously formed part of the portfolio)

Since the establishment of the mortgages trust, total cumulative losses on loans whilst the loan formed part of the portfolio were £144,644,518.92 as at July 2019.

In the late 1980s house prices rose substantially faster than inflation as housing turnover increased to record levels. This was at a time when the economy grew rapidly, which led to falling unemployment and relatively high rates of real income growth. These fed into higher demand for housing, and house prices rose rapidly. Demand was further increased by changes in taxation legislation with regard to tax relief on mortgage payments in 1988. When monetary policy was subsequently tightened (in terms of both “locking in” sterling to the European Exchange Rate Mechanism and higher interest rates), the pace of economic activity first slowed and then turned into recession. Rising unemployment combined with high interest rates led to a fall in housing demand and increased default rates and repossessions. The ability of borrowers to refinance was limited as house prices began to fall and many were in a position of negative equity (borrowings greater than the resale value of the property) in relation to their mortgages.

The level of mortgage arrears on the Halifax loans reduced following the recession in the United Kingdom in the early nineties. The introduction of the scorecard in judging applications – and thus reducing discretion helped to keep the arrears level low, as did a healthy economic climate and low interest rates.

House price inflation has indirectly contributed to the improved arrears situation by enabling borrowers to sell at a profit if they encounter financial hardship.

The dislocation of financial markets in 2007 led to supply issues in the housing finance market while falling house prices and consumer confidence reduced demand for property. This has resulted in some borrowers being unable to sell their property or to refinance their loans due to either a lack of equity, in some instances negative equity, or the lack of available housing finance.

Whilst the economy slowed during 2008 and was in recession for the majority of 2009, during which time unemployment rose, interest rates fell to historically low levels, easing mortgage affordability. This easing of mortgage affordability combined with the use of the scorecard, referred to above, has meant that arrears levels did not rise at this time to the levels experienced in the early nineties. As the economic environment has improved in recent years, the level of arrears has also reduced. In January 2015 and in each month from July 2015 to January 2019, the Seller exercised its option to repurchase accounts three months or more in arrears from the portfolio. The value of loans in arrears has accordingly been reduced relative to where it would otherwise have been.

The following table summarises loans in arrears and repossession experience for loans in the Bank of Scotland portfolio as at the dates specified in the table. The seller will represent and warrant on the Closing Date that no loan to be transferred to the mortgages trust on the Closing Date will have experienced any arrears in the prior 12 months. All of the loans in the table were originated by Halifax or by Bank of Scotland under the "Halifax" brand. Bank of Scotland services all of the Halifax loans.

Bank of Scotland identifies a loan as being in arrears where an amount equal to or greater than one full month's contractual payment is past its due date. Bank of Scotland does not define a loan as defaulted at any particular delinquency level, but rather at the time it takes the related property into possession. Bank of Scotland does not write off a loan as uncollectible until it disposes of the property relating to that loan following default.

* Figures reflect the repurchase of accounts three months or more in arrears.

There can be no assurance that the arrears experience with respect to the loans comprising the portfolio in the future will correspond to the experience of the Bank of Scotland portfolio as set forth in the foregoing table. If the property market experiences a further decline in property values so that the value of the properties in the portfolio falls or (in the case of properties which are currently below the principal balance of the relevant loan) remains, below the principal balances of the loans, the actual rates of arrears and losses could be significantly higher than those previously experienced, as borrowers may no longer be able to refinance their loans or sell their properties and move to more affordable properties. In addition, other adverse economic conditions, whether or not they affect property values, may nonetheless affect the timely payment by borrowers of principal and interest and, accordingly, the rates of arrears and losses with respect to the loans in the portfolio. Noteholders should observe that the United Kingdom experienced relatively low and stable interest rates during the periods covered in the preceding table. If interest rates were to rise, it is likely that the rate of arrears would rise.

Bank of Scotland regularly reviews its lending policies in the light of prevailing market conditions and reviews actions so as to mitigate possible problems. The performance of new business and the arrears profiles are continuously monitored in monthly reports. Any deterioration of the arrears level is investigated and the internal procedures are reviewed if necessary.

CHARACTERISTICS OF THE UNITED KINGDOM RESIDENTIAL MORTGAGE MARKET

The United Kingdom housing market is primarily one of owner-occupied housing, with the remainder in some form of public, private landlord or social ownership. The mortgage market, whereby loans are provided for the purchase of a property and secured on that property, is the primary source of household borrowings in the United Kingdom.

Set out in the following tables are certain characteristics of the United Kingdom mortgage market.

Industry PPR rates

In the following tables, quarterly industry principal payment rate (industry PPR) data was calculated by dividing the amount of scheduled and unscheduled repayments of mortgages made by banks and building societies in a quarter by the quarterly balance of mortgages outstanding for banks and building societies in the United Kingdom. These quarterly repayment rates were then annualised using standard methodology.

House price index

United Kingdom residential property prices, as measured by the Nationwide House Price Index and the Halifax House Price Index (collectively the **Housing Indices**), have generally outperformed the United Kingdom Retail Price Index over the past 25 years. (Nationwide is a United Kingdom building society and Halifax is a brand name of Bank of Scotland, a United Kingdom bank. Markit agreed in March 2015 to acquire the Halifax House Price Index from Lloyds Banking Group.)

The United Kingdom housing market has been through various economic cycles in this period, with large year-to-year increases in the Housing Indices occurring in the late 1980s and the mid 1990s through to mid 2007 and decreases occurring in the early 1990s and mid 2007 through late 2009. Prices remained broadly stable until 2013 and have increased again over recent quarters.

STATIC POOL DATA

This section sets out, to the extent material, certain static pool information with respect to the loans originated by Halifax or by Bank of Scotland under the Halifax brand.

The issuing entity has not included static pool information in this section in respect of prepayments, as this information is not separately identified by the servicer. However, prepayment rates in respect of the mortgage loans in the mortgages trust are set out in the monthly reports to investors that are prepared pursuant to the servicing agreement. To date, prepayment rates in respect of the mortgage loans in the mortgages trust have broadly been in line with the industry PPR data set out on page 43 above.

One of the characteristics of the mortgages trust is that the seller is able to sell more loans to the mortgages trustee over time, whether in connection with an issuance of notes by the issuing entity, any new Funding 2 issuing entity or any Funding 1 issuing entity or in order to maintain the minimum seller share. To aid in understanding changes to the mortgages trust over time, the following table sets out information relating to each sale of loans by the seller to the mortgages trustee pursuant to the mortgage sale agreement.

The sale of new loans by the seller to the mortgages trustee is subject to conditions, including ones required by the rating agencies, designed to maintain certain credit-related and other characteristics of the mortgages trust. These include limits on loans in arrears in the mortgages trust at the time of sale, limits on the aggregate balance of loans sold, limits on changes in the weighted average foreclosure frequency (**WAFF**) and the weighted average loss severity (**WALS**), minimum yield for the loans in the mortgages trust after the sale, the Fitch portfolio tests and maximum LTV for the loans in the mortgages trust after the sale. See a description of these conditions in “**Sale of the loans and their related security — Sale of loans and their related security to the mortgages trustee on the sale dates**” in the base prospectus.
