## Material improvements in credit quality

Gross asset quality ratio, bps

Impaired loans, £bn, & impaired loan ratio

1 – Current rules. 2 – 2014 after reclassification of £28bn back into core business. 3 – 2010 and 2014 on ILAS basis, 2017 and 2018 LCR Eligible primary liquid assets. 4 – Net Debt defined as liquid assets less wholesale funding. 5 - 2017 & 2018 shown on underlying basis (IFRS9 stage 3 loans).

# We have restructured our core loan book, but not at the detriment of scale...

## Re-shaping the core loan book

Core loans and advances to customers<sup>1,2</sup>, £bn

1 – 2010 and 2014 excludes TSB. Excludes run-off loans in all periods. 2 – Prior periods restated to reflect changes in operating structures. 3 – Total book Loan To Deposit ratio. 4 – Excludes TSB.

# ...and transformed our funding profile

## Transformed funding profile

Customer deposits<sup>1</sup>, £bn

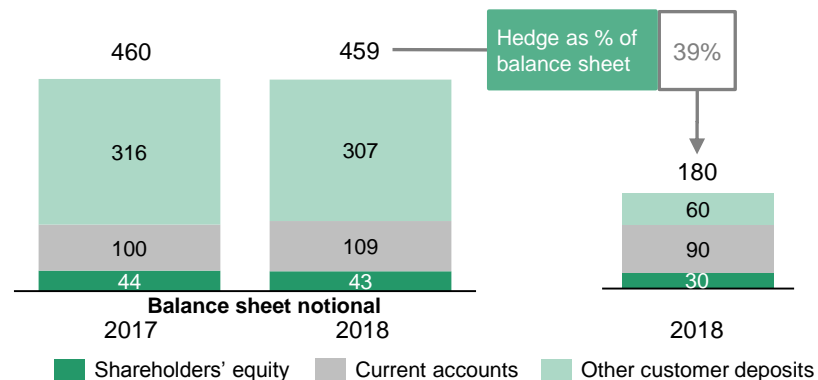

Gross margin

Wholesale funding less than 1 year, £bn

Hedged balances<sup>2</sup>, (£bn)

<sup>1</sup> – Includes Retail Business Banking within SME and other reclassifications. Excludes TSB. 2010 splits estimated due to differences in reporting structure. <sup>2</sup> – Equity, savings and current accounts have a behavioural life of 10, 5 and 10 years respectively.

# The combination of these, and our significant cost advantage, has enabled us to restore profitability within a solid and prudent balance sheet

## Re-shaped balance sheet driving higher income

Net interest margin, %

**Net interest income (£bn)**

## Restoring profitability

Pre-impairment provision underlying operating profit<sup>1</sup>, £bn

- Re-structured balance sheet has supported NII growth in a low rate environment, with growth in net interest margin driven by mix changes and improved deposit margin and funding costs
- Income resilience, combined with market leading efficiency position has enabled a 5% CAGR in pre-provision operating profit since 2014<sup>1</sup>

<sup>1</sup> – Excludes TSB and 2014 run-off contribution.

# Our cultural focus on costs has delivered a best-in-class efficiency position...

## Continued focus on BAU cost reduction

Operating costs<sup>(1)</sup>, £bn

Cost:income ratio (%)<sup>(1)</sup>:

Capex / ATL investment (%):

Investment & Depreciation BAU

- Operating costs 15% lower than 2010; -4% BAU cost CAGR more than offsetting increasing investment
- BAU cost reduction delivered by a number of means, underpinned by matrix management approach:
  - Leaner, more agile organisation
  - Significant reduction in sourcing suppliers, while increasing use of e-auctions
  - Increasing use of technology to simplify back office processes
- Now expect to deliver operating costs of <£8bn in 2019, one year earlier than scheduled
- Targeting low 40s cost:income ratio, exiting 2020

1 – Excludes TSB and operating lease depreciation, includes remediation.

...which creates capacity for increased investment...

**Top quartile investment supported by market leading efficiency**

IT / Technology cash spend as % of operating costs<sup>1</sup>

Reported cost:income ratio

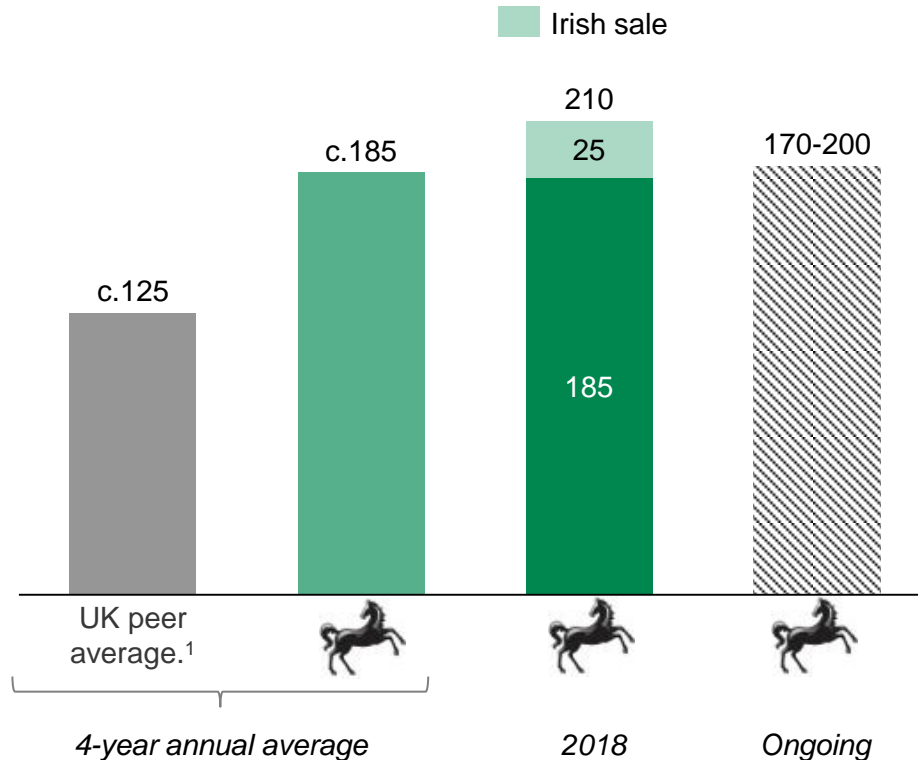

- Significantly increasing investment over the course of the plan period
  - >£3bn strategic investment between 2018-2020
  - Increasing levels of **technology spend**, equating to **16% of operating costs** in 2018, up 24% YoY
- Investment of this size reflects confidence in future and enabled by unique business model and market leading efficiency position
- Virtuous cycle of efficiency a clear competitive advantage, enabling increased investment while committing to net cost reductions and improved customer experience

<sup>1</sup> – Estimated – Proxy for peers technology spend calculated based on available disclosure and may not be like for like.

...whilst supporting the delivery of strong capital build...

### Strong and consistent capital generation

Pre-dividend capital build, bps

- Strongly capital generative business model; expect ongoing capital build of 170-200bps every year:
  - Represents free capital build, over and above uses of capital and known regulatory changes
- Consistent strong capital build provides optionality for long-term management decisions, including:
  - Increasing levels of investment
  - Loan growth across our targeted customer segments
  - Increased returns to shareholders
  - Growing share in under-represented areas e.g. MBNA

<sup>1</sup> – Average of major UK banking peers.

# ...and increasing shareholder returns

## Improving shareholder return

Total capital return to shareholders, £bn

- c.£12bn returned to shareholders over last 5 years, (c.25% of market cap) following dividend resumption in 2014
- £4bn returned to shareholders in 2018 alone, up 26% YoY, including share buyback of up to £1.75bn
- Clear dividend policy, with progressive and sustainable ordinary dividends, whilst maintaining the flexibility to return surplus capital to shareholders
- Ongoing CET1 capital requirement remains around 13% plus a management buffer of around 1%

# Our strategic execution has positioned us well to respond to both opportunities and challenges provided by our evolving operating environment

## Recognising the emerging trends impacting our industry

Further enhancing the customer experience and sourcing new opportunities enabled by greater adoption of technology

Increasing competition across core markets

Greater focus on investment in the core business following the end of significant restructuring efforts

Heightened political and economic uncertainty

## Further improving our efficiency advantage

Cost:income ratio<sup>1</sup>

## Increasing our profitability and returns profile

Statutory RoTE<sup>2</sup>
